

BLADDER CANCER, Current Clinical Urology

Autor:	Droller	
ISBN:	9780896038189	
Páginas:	400	
Año:	2001	
Edición:	1	
Idioma:	Ingles	
Disponible:	De 2 a 3 Semanas	
Precio:	116.60 110.77	Iva no incluido

DESCRIPTION:

Michael J. Droller, MD and a panel of experienced clinicians bring their strong background in clinical research to bear on the assessment and management of bladder cancer. Their comprehensive discussion summarizes the state-of-the-art in diagnosis and treatment, based on the latest understanding of bladder cancer's epidemiology, carcinogenesis, and tumor markers. Topics of particular interest include the role of genetics and molecular biology in evaluating bladder cancer clinically, the evaluation of the results of systemic treatment in advanced disease, the current status of tumor markers in bladder cancer, and the means for further study in their applicability. Insightful and evidenced-based, *Bladder Cancer: Current Diagnosis and Treatment* provides active clinicians and clinical investigators with not only a critical survey of the rapidly expanding research in the area, but also a state-of-the-art tutorial on today's optimal assessment and treatment of bladder cancer.

CONTENTS:

- 1 Demographic and Epidemiologic Aspects of Bladder Cancer
- 2 Biology and Molecular Aspects of Development and Progression of Bladder Cancer
- 3 Diagnosis of Bladder Cancer
- 4 Diagnostic Imaging in Urothelial Cancer
- 5 Urinary Cytology and its Role in Diagnosis and Monitoring of Urothelial Carcinoma
- 6 The Use of Tumor Markers in Bladder Cancer and Current Concepts on Clinical Applicability
- 7 Pathologic Assessment of Bladder Cancer and Pitfalls in Staging
- 8 Intravesical Chemotherapy in the Treatment of Superficial Bladder Cancer
- 9 Use of Intravesical BCG in Treatment of Superficial Bladder Cancer
- 10 Radical Cystectomy and Pelvic Lymphadenectomy in the Treatment of Infiltrative Bladder Cancer
- 11 Considerations in the Use of Neoadjuvant and Adjunctive Systemic Chemotherapy in Treatment of Invasive Bladder Cancer by Cystectomy
- 12 Clinical Situations for the Role of Radiation Therapy in the Treatment of Bladder Cancer
- 13 Current Concepts of Urinary Diversion in Men
- 14 Current Concepts of Urinary Diversion in Women
- 15 Current Prospects for the Use of Molecular Markers in Treatment of Bladder Cancer by Cystectomy or Bladder-Conserving Approaches
- 16 New Possibilities in Systemic Treatment for Metastatic Bladder Cancer
- 17 Statistical Considerations in the Phase II Evaluation of New Therapies
