**DESCRIPTION:**

Pediatric Cardiology is now a recognised speciality but students of general pediatrics, medicine and radiology as well as practising pediatricians often encounter several pediatric cardiological problems during their learning and practice. Thus there is a need for a concise book on pediatric cardiology written in simple, clear language. Prof. Kulkarni has applied his wide experience, knowledge and expertise in producing such a volume.

Throughout the text there is a strong clinical focus which is thoroughly illustrated with line diagrams. Pediatric Cardiology will appeal to undergraduate medical students, practitioners and junior teachers in medical schools, and postgraduates in pediatrics, medicine and radiology.
