DESCRIPTION:

A practical reference for the general veterinary clinician, *Small Animal Pediatrics: The First 12 Months of Life* compiles into a single location the latest information in the rapidly developing field of canine and feline pediatrics. Editors Michael Peterson, DVM, MS, and Michelle Kutzler, DVM, PhD, DACT are joined by more than 40 expert contributors in providing coverage from prenatal care to one year of age. For ease of use, the text is divided into four sections. A General Considerations section opens the book by covering prenatal care of the bitch and queen, birth, normal physical examinations, growth, husbandry, nutrition, care of orphans, neonatal mortality, behavior, emergency and critical care, and immunology. The second section, Common Infectious Diseases, covers bacterial, viral, fungal, rickettsial, and parasitic infections. The third section describes diagnostic and therapeutic approaches to the young patient including radiology, ultrasound, aesthetic and surgical considerations, pain management, pharmacology, and clinical pathology. Finally, the fourth section covers a variety of organ systems with discussions on normal development, congenital conditions, and acquired diseases. The text also includes information that is usually difficult to find, including a pediatric formulary, care of orphan puppies, clinical pathology values, prenatal care, and normal growth and development guidelines.

CONTENTS:**Section I: General Considerations**

Prenatal Care of the Bitch and Queen

Birth and the First 24 Hours

History and Physical Examination of the Neonate

History and Physical Examination of the Weanling and Adolescent
Growth

Husbandry of the Neonate

Standards of Care in Pediatrics

Nutritional Requirements and Feeding of Growing Puppies and Kittens

Care of the Orphaned Puppy and Kitten

Emergency and Critical Care Issues

Neonatal and Pediatric Mortality

Feline Behavioral Development

Canine Behavioral Development

Immunologic Development and Immunization

Section II: Common Infectious Diseases in Puppies and Kittens

Bacterial Infections

Viral Infections

Fungal Infections

Diseases Formerly Known as Rickettsial: The Rickettsioses, Ehrlichioses, Anaplasmoses, and Neorickettsial and Coxiella Infections

Parasitic and Protozoal Diseases

Approach to the Febrile Patient

Section III: Diagnostic and Therapeutic Approaches to the Pediatric Patient

Radiographic Considerations of the Young Patient

Ultrasonography of the Young Patient

Anesthesia in the Pediatric Patient

Surgical Considerations in the Young Patient

Pediatric Fracture Management

Pain Assessment and Management

Pharmacological Considerations in the Young Patient

Toxicological Considerations in the Young Patient

Effective Use of a Veterinary Medical Diagnostic Laboratory

Clinical Chemistry of the Puppy and Kitten

Postmortem Examination of the Puppy and Kitten

Section IV: Systematic Clinical Approach to Diagnosis and Treatment of Pediatric Conditions

The Cardiovascular System

The Hematologic and Lymphoid Systems

The Respiratory System

Dentistry and the Oral Cavity

The Gastrointestinal Tract

The Liver, Biliary Tract, and Exocrine Pancreas

The Urinary System

The Reproductive Tract

The Neurologic System

The Skin and Ear

The Musculoskeletal System

The Eye

Clinical Approach to Nutritional Conditions

The Endocrine System

Selected Zoonotic Diseases: Puppies and Kittens
