

CUNNINGHAM'S TEXTBOOK OF VETERINARY PHYSIOLOGY

Autor:	Klein
ISBN:	9781437723618
Páginas:	720
Año:	2012
Edición:	5
Idioma:	Ingles
Disponible:	De 2 a 3 Semanas
Precio:	102.01 96.91 <small>Iva no incluido</small>

DESCRIPTION:

Understanding the normal functions of the body is essential for successful veterinary practice and for understanding the mechanisms of disease. The 5th edition of Textbook of Veterinary Physiology approaches this vast subject in a practical, user-friendly way that helps you understand how key concepts relate to clinical practice. From cell physiology to body system function to homeostasis and immune function, this comprehensive text gives you the solid foundation you need to provide effective veterinary care.

CONTENTS:**Section I: The Cell**

1. The Molecular and Cellular Bases of Physiologic Regulation
2. Cancer and Cell Cycle Control

Section II: Neurophysiology

3. Introduction to the Neuromuscular System
4. The Neuron
5. The Neuromuscular Synapse
6. The Physiology of Muscle
7. The Concept of a Reflex
8. Skeletal Muscle Stretch Receptors
9. The Concept of Lower and Upper Motor Neurons and Their Malfunction
10. The Brain's Control of Posture and Locomotion
11. The Vestibular System
12. The Cerebellum
13. The Autonomic Nervous System and Adrenal Medulla
14. The Visual System
15. Cerebrospinal Fluid and the Blood-Brain Barrier
16. The Electroencephalogram and Sensory Evoked Potentials
17. Hearing

Section III: Cardiovascular Physiology

18. Overview of Cardiovascular Function
19. Electrical Activity of the Heart
20. The Electrocardiogram
21. The Heart as a Pump
22. The Systemic and Pulmonary Circulations
23. Capillaries and Fluid Exchange
24. Local Control of Blood Flow
25. Neural and Hormonal Control of Blood Pressure and Blood Volume
26. Integrated Cardiovascular Responses

Section IV: Gastrointestinal Physiology and Metabolism

27. Regulation of Gastrointestinal Function
28. Movements of the Gastrointestinal Tract
29. Secretions of the Digestive Tract
30. Digestion and Absorption: The Nonfermentative Processes
31. Digestion: The Fermentative Processes
32. Postabsorptive Nutrient Utilization

Section V: Endocrinology

33. The Endocrine System
34. Endocrine Glands and Their Function

Section VI: Reproduction and Lactation

- 35. Control of Gonadal and Gamete Development
- 36. Control of Ovulation and the Corpus Luteum
- 37. Reproductive Cycles
- 38. Pregnancy and Parturition
- 39. The Mammary Gland
- 40. Reproductive Physiology of the Male

Section VII: Renal Physiology

- 41. Glomerular Filtration
- 42. Solute Reabsorption
- 43. Water Balance
- 44. Acid-Base Balance

Section VIII: Respiratory Function

- 45. Overview of Respiratory Function: Ventilation of the Lung
- 46. Pulmonary Blood Flow
- 47. Gas Exchange
- 48. Gas Transport in the Blood
- 49. Control of Ventilation
- 50. Nonrespiratory Functions of the Lung

Section IX: Homeostasis

- 51. Fetal and Neonatal Oxygen Transport
- 52. Acid-Base Homeostasis
- 53. Thermoregulation

Section X: Immune Function

- 54. Cell, Tissue and Organ Substrates of Immune Function
- 55. Mechanisms of Innate and Acquired Immunity
