DESCRIPTION:

Your step-by-step guide to key emergency and critical care procedures and hands-on nursing care. Whether you need to know how to prioritise your response to a patient with multiple injuries, or you need a quick practical guide to fluid therapy, this is the go-to resource. Colour photographs of real life cases take you through the procedures and after-care, detailing essential skills. This book provides vital information for emergency and critical care situations, whether you're looking for confidence in handling emergency cases in a first-opinion practice, or a relevant, succinct guide for an emergency clinic. Be inspired to become more confident in your clinical skills and abilities, and learn how to apply your existing skills to an emergency situation.

A companion website provides additional resources useful in the management of emergency and critical patients. Visit the website to find information charts and video clips of procedures.

Written by a veterinary nurse and a veterinary surgeon who work together in the largest UK emergency clinic, this book is a practical, how-to manual with a nursing focus.

Suitable as a complete reference for nurses studying towards qualifications, or as a practical guide for daily use by veterinary nurses working in veterinary emergency and critical care.

CONTENTS:

1. Triage and Assessment of the Emergency Patient
2. Monitoring the Critical Patient
3. Vascular Access
4. Shock and Intravenous Fluid Therapy
5. Blood Gas, Acid-Base Analysis and Electrolyte Abnormalities
