## **DESCRIPTION:**

This book provides a new insight on feline ultrasound in the daily practice. From cranial to caudal, the feline species has been thoroughly scanned, detailing for each body region the scanning technique, as well as the ultrasonography of both the normal and the diseased organ.

In each chapter, key points highlight the special features of feline species, and help the reader to focus on the most important. A number of short ultrasound clips along with an additional chapter on Ultrasound guided sampling are also available in the electronic version of the book, increasing even more the interest of this book.

An up-to-date text and a number of references to the latest studies on feline ultrasound make of this book a valuable tool for those veterinary surgeons wanting an in-depth knowledge of diagnostic ultrasound in cats.

## **CONTENTS:**

### **1. Ultrasound of the head and neck**

Scanning technique

Ultrasound of the normal head and neck

Ultrasound in the study of diseases of the head and neck

### **2. Echocardiography**

Scanning technique

Ultrasound of the normal heart

Ultrasound in disorders of the heart

### **3. Non-cardiac thoracic ultrasound**

Scanning technique

Normal non-cardiac thoracic ultrasound

Ultrasound in thoracic lesions

### **4. Ultrasound of the liver and biliary system**

Scanning technique

Ultrasound of the normal liver and biliary system

Ultrasound in liver and biliary diseases

### **5. Ultrasound of the gastrointestinal tract**

Scanning technique

Ultrasound of the normal gastrointestinal tract

Ultrasound in gastrointestinal tract disorders

### **6. Ultrasound of the pancreas**

Scanning technique

Ultrasound of the normal pancreas

Ultrasound in pancreatic disorders

### **7. Ultrasound of the spleen**

Scanning technique

Ultrasound of the normal spleen

Ultrasound in splenic disorders

### **8. Ultrasound of the adrenal glands**

Scanning technique

Ultrasound of the normal adrenal glands

Ultrasound in adrenal disorders

### **9. Ultrasound of the kidneys and ureters**

Scanning technique

Ultrasound of the normal kidneys and ureters

Ultrasound in renal and ureteral disorders

### **10. Ultrasound of the urinary bladder and urethra**

Scanning technique

Ultrasound of the normal bladder and urethra

Ultrasound in bladder and urethral disorders

### **11. Ultrasound of the reproductive system**

Scanning technique

Ultrasound of the normal reproductive system

Ultrasound in disorders of the reproductive system

### **12. Ultrasound of the abdominal cavity, lymph nodes and large vessels**

Scanning technique

Ultrasound of the normal abdominal cavity, lymph nodes and large vessels

Ultrasound in abdominal cavity, lymph node and large vessel lesions

### **13. Ultrasound of the musculoskeletal system and superficial soft tissues**

Scanning technique

Ultrasound of the normal musculoskeletal system and superficial soft tissues

Ultrasound in alterations of the musculoskeletal system and superficial soft tissues

### **14. Sampling and other ultrasound-guided procedures**

General considerations and indications

Materials

Technique

Considerations for sampling and other ultrasound-guided procedures
