DESCRIPTION:

The key to achieving and maintaining attractive and appealing lips is strongly related to understanding and respecting the anatomy of the perioral region. The authors incorporate years of clinical experience into a complete, up-to-date and user-friendly guidance on lip enhancement.

The book is structured into 13 chapters and a 40-min-DVD and reflects all of the very latest developments in research and practice. In excess of 200 exclusive photographs paired with patented anatomical drawings will help readers visualise and understand the pertinent anatomy, describe the pearls and pitfalls of patient selection, detail treatment protocols and modern injection strategies for achieving optimal aesthetic outcomes.

All chapters include an extensive review of the latest literature and studies. Problematic patient types and common complications are also explained alongside photomorphometric, MRI-based and histological aspects of intrinsic ageing. Separate chapters describe surgical protocols including autologous fat grafting, surgery of the upper lip and orthognathic surgical techniques.

"When we look around, we may question some of the outcomes of lip injection. Is the problem one of shape, balance or movement, i.e. an aesthetic problem? Or is it a problem with the product or the technique? These two years of work have provided insight into certain reasons for failure and complications but, above all, have allowed us to review a great deal of received wisdom to confirm or undermine various therapeutic principles."
Patrick Trevidic, MD - Plastic surgeon - Scientific Director of E2e

CONTENTS:

- Chapter 1. History of lip treatments
- Chapter 2. Anatomy of the lips
- Chapter 3. Ageing of upper the lips: clinical analysis
- Chapter 4. Ageing of the lips: photomorphometry, magnetic resonance imaging and histology
- Chapter 5. Anaesthesia of the lips prior to filler injection
- Chapter 6. Lip augmentation techniques
- Chapter 7. Lip enhancement: modern injection products
- Chapter 8. Complications of lip treatments
- Chapter 9. Lips and botulinum toxin
- Chapter 10. Autologous fat grafts for lips
- Chapter 11. Surgery of the upper lip
- Chapter 12. Bone support of the lips: how adult orthognathic surgery can enhance the smile
- Chapter 13. Male lip enhancement guidelines

Other books of the collection:

- + [Ingallina, ANATOMY AND BOTULINUM TOXIN INJECTIONS, Master Collection Vol.1](#)
- + [Andre, ANATOMIA E INYECCIONES DE RELLENO, Master Collection Vol.2](#)
- + [Azib, ANATOMY AND HAND MEDICAL REJUVENATION, Master Collection Vol.3](#)
- + [DeLorenzi, ANATOMY AND FILLER COMPLICATIONS, Master Collection Vol.5](#)

CONTENTS, The content and the index of each of the books is detailed in the individual record of each title.
