DESCRIPTION:

Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, Essential Neonatal Medicine continues to be an indispensable resource that combines the depth and breadth of a textbook with the efficiency of a revision guide.

Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation.

With an improved artwork programme and a new glossary of terms, Essential Neonatal Medicine is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

CONTENTS:

1. The fetus, placenta and changes at birth
2. Perinatal epidemiology and audit
3. Multiple births
4. Neonatal consequences of maternal conditions
5. Resuscitation at birth
6. Examination of the newborn
7. Birth injury
8. Genetic disorders
9. Infant feeding and nutrition
10. Infection in the newborn
11. The extreme preterm infant
12. The low-birthweight infant
13. Respiratory physiology and respiratory support
14. Respiratory disorders
15. Apnoea, bradycardia and upper airway obstruction
16. Cardiovascular disorders
17. Gastrointestinal and abdominal disorders
18. Renal disorders
19. Jaundice
20. Haematological disorders
21. Endocrine and metabolic disorders
22. The central nervous system
23. Neurodevelopmental follow-up and assessment of hearing and vision
24. Developmental care and the neonatal environment
25. Organization of perinatal services
26. Neonatal transport
27. Discharge and follow-up of high-risk infants
28. Parent-infant attachment and support for parents of critically ill infants
29. Ethical issues and decision-making process in the treatment of critically ill newborn infants
30. End-of-life care and palliative care
