

FUNCTIONAL ANATOMY AND PHYSIOLOGY OF DOMESTIC ANIMALS

	Autor:	Reece
	ISBN:	9781119270843
	Páginas:	576
	Año:	2017
	Edición:	5
	Idioma:	Ingles
Disponible:	De 7 a 10 Días	
Precio:	78.60 74.67	Iva no incluido

DESCRIPTION:

Now in its Fifth Edition, Functional Anatomy and Physiology of Domestic Animals provides a basic understanding of domestic animal anatomy and physiology, taking an interconnected approach to structure and function of the horse, dog, cat, cow, sheep, goat, pig, and chicken.

- Offers a readable introduction to basic knowledge in domestic animal anatomy and physiology
- Covers equine, canine, feline, bovine, ovine, ruminant, swine, and poultry anatomy and physiology
- Considers structure and function in relation to each other for a full understanding of the relationship between the two
- Provides pedagogical tools to promote learning, including chapter outlines, study questions, self-evaluation exercises, clinical correlates, key terms, suggested readings, and a robust art program
- Includes access to a companion website with video clips, review questions, and the figures from the book in PowerPoint

CONTENTS:

1. Basics of Structure and Function

The Cell, Its Structure and Functions
Energy Production
Functions of Dna and Rna
Embryology
Tissues

Directional Terms and Planes
Body Cavities

2. Body Water: Properties and Functions

Physicochemical Properties of Solutions
Distribution of Body Water
Water Balance
Dehydration, Thirst, and Water Intake
Adaptation to Water Lack

3. Blood and Its Functions

General Characteristics
Leukocytes
Erythrocytes
Fate of Erythrocytes
Iron Metabolism
Anemia and Polycythemia
Hemostasis: Prevention of Blood Loss
Prevention of Blood Coagulation
Tests for Blood Coagulation
Plasma and Its Composition

4. Nervous System

Structure of the Nervous System
Organization of the Nervous System
The Nerve Impulse and Its Transmission
Reflexes

The Meninges and Cerebrospinal Fluid
Central Nervous System Metabolism

5. The Sensory Organs

Classification of Sensory Receptors
Sensory Receptor Responses
Pain

Taste
Smell
Hearing and Equilibrium
Vision

6. Endocrine System

Hormones
Pituitary Gland
Thyroid Gland
Parathyroid Glands
Adrenal Glands
Pancreatic Gland
Prostaglandins and Their Functions

7. Bones, Joints, and Synovial Fluid

General Features of the Skeleton
Bone Structure
Bone Formation
Bone Repair
Joints and Synovial Fluid

8. Muscle

Classification
Arrangement
Skeletal-Muscle Harnessing
Microstructure of Skeletal Muscle
Skeletal-Muscle Contraction
Comparison of Contraction among Muscle Types
Changes in Muscle Size

9. The Cardiovascular System

Heart and Pericardium
Blood Vessels
Lymphatic System
Spleen
Cardiac Contractility
Electrocardiogram
Heart Sounds
Heart Rate and Its Control
Blood Pressure
Blood Flow
Capillary Dynamics

10. The Respiratory System

Respiratory Apparatus
Factors Associated with Breathing
Respiratory Pressures
Pulmonary Ventilation
Diffusion of Respiratory Gases
3 Oxygen Transport
Carbon Dioxide Transport
Regulation of Ventilation
Respiratory Clearance
Nonrespiratory Functions of the Respiratory System
Pathophysiology Terminology
Avian Respiration

11. The Urinary System

Gross Anatomy of the Kidneys and Urinary Bladder
The Nephron
Formation of Urine
Glomerular Filtration
Tubular Reabsorption and Secretion
Countercurrent Mechanism
Concentration of Urine
Extracellular Fluid Volume Regulation
Aldosterone
Other Hormones with Kidney Association
Micturition
Characteristics of Mammalian Urine
Renal Clearance
Maintenance of Acid-Base Balance
Avian Urinary System

12. Digestion and Absorption

Introductory Considerations
The Oral Cavity and Pharynx
The Simple Stomach

Intestines
Accessory Organs
Composition of Foodstuffs
Pregastric Mechanical Functions
Gastrointestinal Motility
Mechanical Functions of the Stomach and Small Intestine
Mechanical Functions of the Large Intestine
Digestive Secretions
Digestion and Absorption
The Ruminant Stomach
Characteristics of Ruminant Digestion
Chemistry and Microbiology of the Rumen
Ruminant Metabolism
Avian Digestion

13. Body Heat and Temperature Regulation

Body Temperature
Physiologic Responses to Heat
Physiologic Responses to Cold
Hibernation
Hypothermia and Hyperthermia

14. Male Reproduction

Testes and Associated Structures
Descent of the Testes
Accessory Sex Glands and Semen
Penis and Prepuce
Muscles of Male Genitalia
Spermatogenesis
Erection
Mounting and Intromission
Emission and Ejaculation
Factors Affecting Testicular Function
Reproduction in the Avian Male

15. Female Reproduction

Functional Anatomy of the Female Reproductive System
Hormones of Female Reproduction
Ovarian Follicle Activity
Sexual Receptivity
Estrous Cycle and Related Factors
Pregnancy
Parturition
Involution of the Uterus
Reproduction in the Avian Female

16. Lactation

Functional Anatomy of Female Mammary Glands
Mammogenesis
Lactogenesis and Lactation
Composition of Milk
Milk Removal and Other Considerations
