	<b>Idioma:</b>	Inglés	
<b>Disponible:</b>	<b>Agotado</b>		
<b>Precio:</b>	<del>159.59</del> 151.61		Iva no incluido

**DESCRIPTION:**

The 5th edition of this indispensable resource captures the latest insights in neonatal neurology in a totally engaging, readable manner. World authority Dr. Joseph Volpe has completely revised his masterwork from cover to cover, describing everything from the most up-to-the-minute discoveries in genetics through the latest advances in the diagnosis and management of neurologic disorders. He delivers all the clinical guidance you need to provide today's most effective care for neonates with neurological conditions.

**New to this Edition:**

- Features a brand new, full-color design with hundreds of new figures, tables, algorithms, and micrographs.
- Includes two entirely new chapters: Neurodevelopmental Follow-Up and Stroke in the Newborn a new section on Neonatal Seizures and an extensively expanded section on Hypoxic-Ischemia and Other Disorders.
- Showcases the experience and knowledge of a new editorial team, led by Dr. Joseph Volpe and Dr. Terrie E. Inder, Chief of the Department of Pediatric Newborn Medicine at Brigham and Women's Hospital, all of whom bring a wealth of insight to this classic text.
- Offers comprehensive updates from cover to cover to reflect all of the latest information regarding the development of neural tube prosencephalic development congenital hydrocephalus cerebellar hemorrhage neuromuscular disorders and genetic testing and much more.
- Uses an improved organization to enhance navigation.
- Expert Consult® eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, Q&As, and references from the book on a variety of devices.

**CONTENTS:**

**Unit I: Human Brain Development**

1. Neural Tube Development and Defects
2. Prosencephalic Development and Defects
3. Congenital Hydrocephalus
4. Cerebellar Development and Defects
5. Neuronal Proliferative Events and Defects
6. Neuronal Migrational Events and Defects
7. Organizational Events and Defects
8. Myelination Events and Defects

**Unit II: Neurological Evaluation**

9. Neurological Examination: Normal and Abnormal Features
10. Specialized Neurological Studies
11. Neurodevelopmental Followup

**Unit III: Neonatal Seizures**

12. Neonatal Seizures

**Unit IV: Hypoxic-ischemic and Related Disorders**

13. Pathophysiology General Principles
14. Encephalopathy of the Preterm - Neuropathology
15. Encephalopathy of the Preterm - Pathophysiology
16. Encephalopathy of the Preterm - Clinical - Neurological Features, Diagnosis, Imaging, Prognosis, Therapy
17. Intrauterine, Intrapartum Assessments in the Term Infant
18. Hypoxic Ischemic Injury in the Term Infant - Neuropathology
19. Hypoxic Ischemic Injury in the Term Infant - Pathophysiology
20. Hypoxic Ischemic Injury in the Term Infant - Clinical - Neurological Features, Diagnosis, Imaging, Prognosis, Therapy
21. Stroke in the Newborn

**Unit V: Intracranial Hemorrhage**

22. Intracranial/Hemorrhage - Supratentorial (Subdural, Subarachnoid, Intraventricular (Term Infant), Miscellaneous)
23. Intracranial Hemorrhage Infratentorial/Cerebellar
24. Preterm IVH/Posthemorrhagic Hydrocephalus

## **Unit VI: Metabolic Encephalopathies**

25. Glucose
26. Bilirubin
27. Amino acids
28. Organic acids

## **Unit VII: Degenerative Disorders**

29. Degenerative Disorders of the Newborn

## **Unit VIII: Neuromuscular Disorders**

30. Evaluation, Specialized Studies
31. Arthrogyposis Multiplex Congenita
32. Levels Above Lower Motor Neuron to Neuromuscular Junction
33. Muscle Involvement and Restricted Disorders

## **Unit IX: Intracranial Infections**

34. Viral, Protozoan and Related Intracranial Infections
35. Bacterial and Fungal Intracranial Infections

## **Unit X: Perinatal Trauma**

36. Injuries of Extracranial, Cranial, Intracranial, Spinal Cord and Peripheral Nervous System Structures

## **Unit XI: Intracranial Mass Lesions**

37. Brain Tumors and Vein of Galen Malformations

## **Unit XII: Drugs and the Developing Nervous System**

38. Passive Addiction and Teratogenic Effects

### **Author Information:**

By **Terrie E Inder**, MB, ChB, MD, Brigham and Women's Hospital, Department of Pediatric Newborn Medicine, Boston, Massachusetts **Joseph J. Volpe**, MD, Bronson Crothers Professor of Neurology, Harvard Medical School, Neurologist-in-Chief, Children's Hospital, Boston, MA **Adre J du Plessis**, MB, ChB, The Fetal Medicine Institute, Children's National Health System, Washington, District of Columbia **Jeffrey M Perlman**, MBChB, Chief, Division of Newborn Medicine, Professor of Pediatrics, Weill Cornell Medical College, New York, New York **Basil T. Darras**, Children's Hospital, Boston, MA, USA **Jeffrey Neil**, MD, Boston Children's Hospital, Department of Neurology, Boston, Massachusetts and **Linda S de Vries**, MD, Professor of Neonatal Neurology, Department of Neonatology, UMC Utrecht, Utrecht, The Netherlands
