

CLINICAL PATHWAYS IN NEURO-OPHTHALMOLOGY

	Autor:	Smith
	ISBN:	9781626232853
	Páginas:	350
	Año:	2018
	Edición:	3
	Idioma:	Ingles
Disponible:	De 7 a 10 Días	
Precio:	125.00 118.75	Iva no incluido

DESCRIPTION:

It is paramount for clinicians to understand the distinguishing signs and symptoms among many different local and systemic neuro-ophthalmic disorders in order to provide the most efficacious evaluations and treatments. *Clinical Pathways in Neuro-Ophthalmology: An Evidence-Based Approach, Third Edition* reflects the authors' extensive training and experience in the field of neuro-ophthalmology, as well as updates in the field. Stacy Smith, Andrew Lee, Paul Brazis, and an impressive group of contributors have written an unsurpassed learning tool on how to manage patients with known or presumed neuro-ophthalmologic conditions, in the most logical, straightforward, and cost-effective manner.

The authors share significant clinical pearls and knowledge throughout 20 chapters. The book lays a solid foundation on the management of neurologic eye disorders including symptoms, ophthalmologic testing, diagnosis, and treatment. Among the discussed disorders are anterior and retrobulbar optic neuropathies, disorders of ocular motility and alignment, lid abnormalities, and anisocoria. Insights are provided on key topics including the use of office examinations, laboratory tests, and neuroimaging studies to make an ophthalmologic diagnosis and ophthalmologic therapy to treat eye movement disorders such as nystagmus.

Key Highlights:

- Unique graphic algorithms help clinicians differentiate conditions with frequently overlapping clinical manifestations
- The evaluation and treatment of various neuro-ophthalmologic processes, stratified by four classes of evidence and four levels of clinical recommendation
- A basic set of references for each subject enables readers to expand knowledge
- High quality four-color clinical images enhance learning

This book is essential reading for neuro-ophthalmologists, ophthalmologists, neurologists, and residents and fellows in these fields of medicine.

CONTENTS:

1. The Diagnosis of Optic Neuropathies
2. Optic Neuritis
3. Optic Disc Edema with a Macular Star and Neuroretinitis
4. Nonarteritic Ischemic Optic Neuropathy
5. Arteritic Anterior Ischemic Optic Neuropathy and Giant Cell Arteritis
6. Traumatic Optic Neuropathy
7. Papilledema
8. Transient Vision Loss
9. Visual Field Defects
10. Diplopia
11. Third Nerve Palsies
12. Fourth Nerve Palsies
13. Sixth Nerve Palsies
14. Supranuclear Disorders of Gaze
15. Ocular Myasthenia Gravis
16. Thyroid Eye Disease: Graves Ophthalmopathy
17. Nystagmus and Other Ocular Oscillations
18. Ptosis
19. Lid Retraction and Lid Lag
20. Anisocoria and Pupillary Abnormalities
