DESCRIPTION:

Do you know that hands are the second most visible body part after the face? In fact, hands age faster than the face and are, therefore, labelled as the "age giveaways". Whilst a wide range of publications focus on face rejuvenation, this never-before-published book-and- DVD set is unique in its exclusive focus on all aspects of hand rejuvenation.

The title, co-authored by 8 leading experts under the scientific direction of Marc Lefebvre-Vilardebo, MD, synthesizes years of rigorous medical research and provides evidence-based guidelines for achieving the best possible hand aesthetics: anatomical keys for optimal hand volumising, non-surgical options to treat dilated veins, and skin rejuvenation protocols.

This must-have reference is particularly treasured by cosmetic physicians & nurses, but also students training or practicing in aesthetic medicine or dermatology.

CONTENTS:

1. History of hand rejuvenation
2. Features of the ageing hand. Aims of rejuvenation
3. Anatomical keys for optimal volumising dorsal hand filling
4. Do we currently have ideal injectables for hand rejuvenation?
5. Dilated dorsal hand veins: phlebectomy or sclerotherapy?
6. Local anesthesia for hand rejuvenation
7. Skin rejuvenation

Other books of the collection:

+ [Ingallina, ANATOMY AND BOTULINUM TOXIN INJECTIONS, Master Collection Vol.1](#)

+ [Andre, ANATOMIA E INYECCIONES DE RELLENO, Master Collection Vol.2](#)

+ [Azib, ANATOMY AND LIP ENHANCEMENT, Master Collection Vol.4](#)

+ [DeLorenzi, ANATOMY AND FILLER COMPLICATIONS, Master Collection Vol.5](#)

CONTENTS, The content and the index of each of the books is detailed in the individual record of each title.
