## **DESCRIPTION:**

This book is the first to provide comprehensive information in one place on the management of neuromuscular disorders (NMDs) in children. Written by experts from the international NMD community, this volume describes the natural history of the most frequent NMDs, such as Duchenne muscular dystrophy spinal muscular atrophy, hereditary neuropathies, congenital and metabolic neuropathies and myasthenic syndromes.

Best practice management of key functions typically affected by NMDs, such as, cognition and mental health, respiratory function, gastrointestinal, nutritional and cardiology management is provided. Sexual issues and transition to adulthood are also discussed. The final part of the book provides a critical review of new evidenced-based management approaches to NMDs. The large number of healthcare professionals involved in managing children with NMDs will find this a useful one-stop reference resource.

## **CONTENTS:**

### **Section A: Introduction**

1. Parent Perspectives on Neuromuscular Disorders: From Diagnosis, to Parenting and Living With, to Advance Care Planning and Preparing for Death

2. The Importance of Setting up Guidelines for Neuromuscular Disorders

3. A Multidisciplinary Approach and Management as Best Care Model in Neuromuscular Disorders

### **Section B: Assessment of a Child with a Neuromuscular Disorder: The Cornerstone for Management**

4. Clinical Evaluation and Diagnostic Approach

5. The Importance of Evaluating Function in Neuromuscular Disorders

### **Section C: Overview of the Most Frequent Neuromuscular Conditions in Children and Disease Specific Medical Management**

6. Spinal Muscular Atrophy and Other Motor Neuron Diseases

7. Inherited Neuropathies

8. Acquired Neuropathies

9. Disorders of the Neuromuscular Junction: Inherited Myasthenic Syndromes and Juvenile Myasthenia Gravis

10. Duchenne and Becker Muscular Dystrophies

11. Limb Girdle Muscular Dystrophies

12. Congenital Muscular Dystrophies

13. Facioscapulohumeral Muscular Dystrophy

14. Congenital Myopathies

15. Myotonic Dystrophies

16. Pompe Disease

17. Mitochondrial Disorders

18. Channelopathies

19. Inflammatory Myopathies

### **Section D: Physical Rehabilitation and Orthopaedic Management**

20. Lifelong Physiotherapy: Staying Active

21. Management of of Contractures: Stretching, Positioning and Splinting

22. Occupational Therapy and Robotics

23. Orthopedic Complications in Neuromuscular Disorders

24. Neuromuscular Scoliosis

### **Section E: Respiratory Management**

25. Assessment and Management of Respiratory Function in Children with Neuromuscular Disorders

### **Section F: Feeding and Gastrointestinal Management**

26. Gastro-intestinal Complications and Nutrition

### **Section G: Cardiac Management**

27. Cardiac Management in Children with Neuromuscular Disorders

### **Section H: Psychosocial Aspects**

28. Cognitive, Behavioral and Psychosocial Aspects of Growing Up with a Neuromuscular Disease

29. Transition to Adulthood

30. Sexual Health Needs in Patients with Neuromuscular Disorders
