Precio: 219.00 208.05		Iva no incluido

DESCRIPTION:

Focus on the "how" and "why" of medical/surgical conditions _ the critical issues that lead to successful outcomes for your patients _ with Veterinary Surgery: Small Animal Expert Consult, 2nd Edition. This two-volume full-color resource offers an authoritative, comprehensive review of disease processes, a thorough evaluation of basic clinical science information, and in-depth discussion of advanced surgeries.

With an updated website you can access anytime and detailed coverage of surgical procedures, it is the definitive reference for surgical specialists, practicing veterinarians, and residents preparing for ACVS and ECVS board certification.

Key Features:

- Comprehensive coverage includes surgical biology, surgical methods and perioperative care, neurosurgery, and orthopedics in Volume I soft tissue surgery is covered in Volume II.
- Extensive references to published studies show the factual basis for the material.
- An outstanding art program with sophisticated color drawings and high-quality photographs clarifies key concepts and brings you closer to a 3-D view of surgical procedures, much like you will experience in practice.
- Strong blend of clinical and basic science information facilitates a clear understanding of clinical issues surrounding operative situations.
- Website offers access to the entire text online, plus references linked to original abstracts on PubMed. Organization and content parallels the American and European Colleges of Veterinary Surgery written examinations to provide excellent preparation for certification and recertification.
- Highly recognized contributing authors create chapters from their own experience and knowledge base, providing the most authoritative, current information available.
- Coverage of anatomy, physiology, and pathophysiology in chapters on specific organs includes information critical to operative procedures and patient management.
- In-depth chapters on anesthesia, surgical oncology, tumors of the spine, and musculoskeletal neoplasia provide valuable resources for practicing surgeons, especially in the area of cancer treatment.
- Preoperative considerations and surgical implications for surgical procedures help surgeons make decisions about treatment approaches.

CONTENTS:

VOLUME ONE: SURGICAL PRINCIPLES, NEUROSURGERY, AND ORTHOPEDIC SURGERY

Section I: Surgical Biology

1. Inflammatory Response
2. Molecular and Cellular Biology: Genomics
3. Stem Cell and Regenerative Medicine
4. Platelet Rich Plasma and Autologous Conditioned Sera
5. Fluid Therapy
6. Shock
7. Bleeding and Hemostasis
8. Metabolism and Nutritional Needs of Surgical Patients
9. Wound Healing
10. Wound Infections and Antimicrobial Use

Section II: Surgical Methods and Perioperative Care

11. Sterilization
12. Instrumentation
13. Preparation of the Patient, Operating Team, and Operating Room for Surgery
14. Monitoring for Surgical Infection
15. Principles and Use of Energy Sources in Small Animal Surgery: Electrosurgery and Laser Applications
16. Suture Material, Tissue Staplers, Ligation Devices, and Closure Methods
17. Instrument and Tissue Handling Techniques

18. Surgical Hemostasis
19. Bandages and Drains
20. Biopsy General Principles
21. Anesthesia Principles and Monitoring
22. Anesthetic Practice for Existing Conditions
23. Fundamentals of Interventional Radiology and Interventional Endoscopy
24. Fundamentals of Laparoscopy and Thoracoscopy
25. Introduction to Oncologic Surgery for the General Surgeon

Section III: Neurosurgery

26. Neurologic Examination and Neuroanatomic Diagnosis
27. Neurodiagnostics
28. Imaging of the Neurologic System
29. Pathogenesis and Physiology of Central Nervous System Disease and Injury
30. Medical Conditions of the Vertebral Column and Spinal Cord
31. Cervical Spine
32. Thoracolumbar Vertebral Column
33. Degenerative Lumbosacral Stenosis
34. Vertebral Fractures, Luxations, and Subluxations
35. Cranial Surgery
36. Anesthesia for Intracranial Surgery
37. Spinal Neoplasia

Section IV: Musculoskeletal System

38. Tissues of the Musculoskeletal System
39. Fracture Biology and Biomechanics
40. Open Fractures
41. Internal Fracture Fixation
42. External Skeletal Fixation
43. Minimally Invasive Fracture Repair
44. Orthopedic Coaptation Devices and Small-Animal Prosthetics
45. Delayed Unions, Nonunions, and Malunions
46. Principles of Angular Limb Deformity Correction
47. Osteomyelitis
48. Bone Grafts and Substitutes
49. Scapula Fractures
50. The Shoulder
51. Fractures of the Humerus
52. Surgical Diseases of the Elbow
53. Total Elbow Replacement in Dogs
54. Radius and Ulna
55. Carpus, Metacarpus, and Digits
56. Fractures of the Pelvis
57. Coxofemoral Luxation
58. Pathogenesis, Diagnosis, and Control of Canine Hip Dysplasia
59. Surgical Therapy of Canine Hip Dysplasia
60. Fractures of the Femur
61. Stifle Joint
62. Total Knee Replacement
63. Fractures of the Tibia and Fibula
64. Tarsus and Metatarsus
65. Amputations
66. Dentistry for the Surgeon
67. Mandibular and Maxillofacial Fractures
68. Arthritis
69. Miscellaneous Orthopedic Conditions
70. Muscle and Tendon Disorders
71. Arthroscopy
72. Musculoskeletal Neoplasia and Limb-Sparing Surgery
73. Osteochondrosis
74. Gait Analysis

VOLUME TWO: SOFT TISSUE SURGERY

Section V: Skin and Reconstruction

75. Primary Wound Closure
76. Open Wounds
77. Tension-Relieving Techniques
78. Local or Subdermal Plexus Flaps
79. Axial Pattern and Myocutaneous Flaps
80. Skin Grafts
81. Burns
82. Specific Disorders

Section VI: Abdomen

- 83. Spleen
- 84. Abdominal Wall Reconstruction and Hernias
- 85. Diaphragmatic Hernias
- 86. Peritoneum and Retroperitoneum

Section VII: Digestive System

- 87. Soft Tissues of the Oral Cavity
- 88. Salivary Glands
- 89. Mandibulectomy and Maxillectomy
- 90. Esophagus
- 91. Stomach
- 92. Small Intestine
- 93. Colon
- 94. Rectum, Anus, and Perineum
- 95. Liver and Biliary System
- 96. Hepatic Vascular Anomalies
- 97. Pancreas
- 98. Feeding Tubes

Section VIII: Respiratory System

- 99. Nasal Planum, Nasal Cavity, and Sinuses
- 100. Palate
- 101. Larynx
- 102. Trachea and Bronchi
- 103. Lungs

Section IX: Thorax

- 104. Thoracic Wall
- 105. Thoracic Cavity

Section X: Cardiovascular System

- 106. Cardiac Surgery
- 107. Pericardial Surgery
- 108. Vascular Surgery

Section XI: Urogenital System

- 109. Ovaries and Uterus
- 110. Vagina, Vestibule, and Vulva
- 111. Testes, Epididymides, and Scrotum
- 112. Penis and Prepuce
- 113. Prostate
- 114. Kidneys
- 115. Ureters
- 116. Bladder
- 117. Urethra
- 118. Sphincter Mechanism Incontinence
- 119. Renal Transplant

Section XII: Endocrine System

- 120. Adrenal Glands
- 121. Thyroid and Parathyroid Glands

Section XIII: Ear

- 122. Pinna and External Ear Canal
- 123. Middle and Inner Ear

Section XIV: Eye

- 124. Basic Ophthalmic Surgical Procedures
- 125. Emergency Ophthalmic Surgery
