

THE ESC TEXTBOOK OF CARDIOVASCULAR IMAGING

	Autor:	Zamorano	
	ISBN:	9780198849353	
	Páginas:	928	
	Año:	2021	
	Edición:	3	
	Idioma:	Ingles	
Disponible:	En Stock		
Precio:	174.44 165.72		Iva no incluido

DESCRIPTION:

The ESC Textbook of Cardiovascular Imaging third edition provides extensive coverage of all cardiovascular imaging modalities. Produced in collaboration with the European Association of Cardiovascular Imaging with contributions from specialists across the globe and edited by a distinguished team of experts, it is a "state of the art" clinically-orientated imaging reference.

Now fully revised and updated with the latest imaging techniques and technology and covering even more conditions than before, it not only discusses the principles of individual modalities but also clearly demonstrates the added value each technique can bring to the treatment of all cardiac diseases. Richly illustrated with colour figures, images, and tables and using a wealth of newly available evidence to link theory to practice, it demonstrates how these techniques can be used in the diagnosis of a range of cardiovascular diseases. Learning how to apply them in practice is made easy with free access to videos and imaging loops online.

Impressive in scope, The ESC Textbook of Cardiovascular Imaging contains information on cutting-edge technical developments in echocardiography, CT, CMR and hybrid imaging and well imaging's current role in cardiac intervention such as identifying cardiac structures, helping to guide procedures and exclude possible complications. The application of imaging modalities in conditions such as valvular and coronary heart disease, heart failure, cardiomyopathies, peri-myocardial disease, adult congenital heart disease and aortic disease, is also extensively considered.

From discussion on improved imaging techniques and advances in technology, to guidance and explanation of key practices and theories, this new edition of The ESC Textbook of Cardiovascular Imaging is the ideal reference guide for cardiologists and radiologists alike.

The print edition of The ESC Textbook of Cardiovascular Imaging comes with access to the online version on Oxford Medicine Online, for as long as the edition is published by Oxford University Press. By activating your unique access code you can read and annotate the full text online, follow links from the references to primary research materials, and view, enlarge and download all the figures and tables.

CONTENTS:

Section 1: Technical Aspects of imaging

- 1:Conventional Echocardiography - basic principles, Andreas Hagendorff, Stephan Stobe, and Bhupendar Tayal
- 2:Nuclear Cardiology (PET & SPECT) - basic principles, Danilo Negila, Riccardo Liga, Stephan Nekolla, Frank M. Bengel, Ornella Rimoldi, and Paolo G. Camici
- 3:Cardiac CT - basic principles, Gianluca Pontone and Filippo Cademartiri
- 4:CMR - basic principles, Jan Bogaert, Rolf Symons, and Jeremy Wright
- 5:Training and Competence in Cardiovascular Imaging, Kevin Fox and Marcelo Di Carli

Section 2: New technical developments in imaging techniques

- 6.1:Three-dimensional echocardiography, Silvia Gianstefani and Mark Monaghan
- 6.2:Assessment of myocardial function by speckle tracking echocardiography, Thor Edvardsen, Lars Gunnar Klæboe, Irena Szymczyk, and Jarosław Kasprzak
- 7:Contrast echocardiography, Roxy Senior, Harald Becher, Fausto Pinto, and Raj Khattar
- 8:Echocardiography in the cathlab: fusion imaging and use of intracardiac echocardiography, Covadonga Fernandez-Garcia and Jose Zamorano
- 9:Hybrid imaging: PET-CT and SPECT-CT, PET-MRI, Antti Saraste, Sharmila Dorbala and Juhani Knuuti
- 10:New technical developments in CT: anatomy, FFR and machine learning, Stephan Achenbach, Jonathan Leipsic, and James Min

Section 3: Valvular heart disease

- 11:Aortic valve stenosis, Philippe Pibarot, Helmut Baumgartner, Marie-Annick Clavel, Nancy Côté and Stefan Orwat
- 12:Aortic valve regurgitation, Julien Magne and Patrizio Lancellotti
- 13:Mitral valve stenosis, Ferande Peters and Eric Brochet
- 14:Mitral valve regurgitation, Daniel Rodríguez Muñoz, Kyriakos Yiangou, and Jose Zamorano

- 15:Tricuspid and pulmonary valve disease, Denisa Muraru and Elif Sade
16:Multiple and mixed valvular heart disease, Philippe Unger and Madalina Garbi
17:Intraoperative transesophageal echocardiography for valvular surgery, Youssef Malouf and Hector Michelena
18:Valvular prostheses, Luigi Badano and Denisa Muraru
19:Endocarditis, Daniel Rodríguez and Álvaro Marco

Section 4: Procedures in Intensive Cardiovascular Care Unit

- 20:Imaging guided transseptal puncture and transcatheter closure of patent ovale foramen/atrial septal defect, ventricular septal defect and paravalvular leaks, Itzhak Kronzon, Juan Manuel Monteagudo, Francesco Faletra, Priti Mehla and Muhamed Saric
21:Imaging for electrophysiological procedures, Louisa O'Neill, Iain Sim, John Whitaker, Steven Williams, Henry Chubb, Pál Maurovich-Horvat, Mark O'Neill and Reza Razavi
22:Transcatheter aortic valve implantation, Victoria Delgado, Jeroen Bax, and Arnold Ng
23:Transcatheter mitral valve interventions, Nina Wunderlich, Robert Siegel, Ronak Rajani, and Nir Flint
24:Transcatheter tricuspid valve repair/replacement, Rebecca Hahn
25:Transcatheter pulmonic valve replacement, Kuberan Pushparajah and Alessandra Frigiola

Section 5: Coronary artery disease

- 26:Echocardiography and detection of coronary artery disease, Thor Edvardsen, Marta Sitges, and Rosa Sicari
27:Nuclear cardiology and detection of coronary artery disease, Richard Underwood, James Stirrup, and Danilo Neglia
28:PET-CT and detection of coronary artery disease, Marcelo Di Carli
29:MCST and detection of coronary artery disease, Stephan Achenbach and Pal Maurovich-Horvat
30:CMR and detection of coronary artery disease, Eike Nagel, Juerg Schwitler, and Sven Plein
31:Imaging the vulnerable atherosclerotic plaque/Imaging the vulnerable atherosclerotic plaque, David Newby, Marc Dweck, Jagat Narula, and Rong Bing
32:Imaging microvascular disease, Paolo Camici and Ornella Rimoldi

Section 6: Heart Failure

- 33:Evaluation of systolic LV function and LV mechanics, Rainer Hoffmann and Frank A. Flachskampf
34:Evaluation of diastolic LV function, Bogdan Popescu, Carmen C. Beladan and Maurizio Galderisi
35:Evaluation of RV function, Lawrence Rudski, Petros Nihoyannopoulos, and Sarah Blissett
36:Assessment of viability, Luc Pierard, Paola Gargiulo, Pasquale Perrone-Filardi, Bernhard Gerber, and Joseph Selvanayagam
37:Imaging cardiac innervation, Albert Flotats and Ignasi Carrio
38:Cardiac resynchronization therapy: selection of candidates, Victoria Delgado and Jens Uwe Voigt
39:Cardiac resynchronization therapy: optimization and follow-up, Marta Sitges and Erwan Donal
40:Echocardiography evaluation in extracorporeal support, Susanna Price and Alessia Gambaro
41:Cardio-oncology, Riccardo Asteggiano, Patrizio Lancellotti, Maurizio Galderisi, Stephane Edhery, and Marie Moonen

Section 7: Cardiomyopathies

- 42:Hypertrophic cardiomyopathy, Nuno Cardim, Alexandra Toste, and Robin Nijveldt
43:Infiltrative cardiomyopathy, Massimo Lombardi, Silvia Pica, Antonia Camporeale, Alessia Gimelli, and Dudley Pennell
44:Dilated cardiomyopathy, Upasana Tayal, Sanjay Prasad, Tjeerd Germans, and Albert van Rossum
45:Other genetic and acquired cardiomyopathies, Kristina Haugaa and Perry Elliott

Section 8: Peri-myocardial disease

- 46:Pericardial effusion and tamponade, Allan Klein, Bernard Cosyns, and Aldo Schenone
47:Constrictive pericarditis, Alida Caforio, Maurizio Galderisi, Massimo Imazio, Renzo Marcolongo, Yehuda Adler, and Ciro Santoro
48:Myocarditis, Ali Yilmaz, Heiko Marholdt, and Udo Sechtem
49:Cardiac masses and tumors, Teresa Lopez-Fernandez and Peter Buser

Section 9: Aortic disease: aneurysm and dissection

- 50:Gender considerations in acute coronary syndromes, Arturo Evangelista and Gisela Teixidó-Turá
51:Role of CMR, Jose Rodriguez Palomares and Arturo Evangelista
52:Role of MSCT, Rocio Hinojar and Raimond Erbel

Section 10: Adult congenital heart disease

- 53:Role of echocardiography, Lindsay Smith, Mark K. Friedberg and Luc Mertens
54:Role of CMR and MSCT, Giovanni Di Salvo and Francesca Pluchinotta
