DESCRIPTION:

Dozens of new clinical cases, enlarged photographs, new abstracts and algorithms, and more make the 4th Edition of *Local Flaps in Facial Reconstruction* your state-of-the-art resource for achieving optimal results for the full range of facial flap procedures. It offers detailed visual guidance and unmatched expertise from prominent surgeons in otolaryngology, ophthalmology, plastic surgery, and dermatology, reflecting the multi-specialty nature of this dynamic field. Full-color clinical photographs and line drawings, along with high-quality surgical video clips, capture the latest, most effective facial reconstruction practices and methods.

Key Features:

- Clearly demonstrates practical and effective methods of reconstruction of skin defects in a variety of sizes, configurations, and locations on the head and neck.
- Covers the basic concepts of flap physiology, design, and mechanics of flap transfer, including multiple clinical examples for each flap the second section describes the use of local flaps in reconstruction of individual facial structures including the auricles, lips, eyelids, cheeks, forehead, and nose.
- Contains many new clinical cases, new abstracts preceding each chapter, new algorithms for selecting the preferred local flap, an updated and expanded bibliography, newer approaches to facial reconstruction, and enlarged photographs to better view flap design, planes of dissection, and methods of flap transfer.
- Offers new, more complex clinical cases of nasal reconstruction, as well as updated coverage of new wound closure techniques and materials.
- Includes an outstanding video library demonstrating the design, dissection, and transfer of the majority of local flaps and grafts currently in use today, accompanied by expert commentary.
- Features more than 2,300 superb illustrations and photographs of rotation flaps, transposition flaps, advancement flaps, bilobe flaps, melolabial flaps, paramedian forehead flaps, rhombic flaps, and mucosal flaps.
- Enhanced eBook version included with purchase. Your enhanced eBook allows you to access all of the text, figures, and references from the book on a variety of devices.

CONTENTS:

SECTION I. FUNDAMENTALS

CHAPTER 1. ANATOMY OF THE SKIN

Abstract

INTRODUCTION

GENERAL CHARACTERISTICS

EPIDERMIS

DERMAL-EPIDERMAL JUNCTION

DERMIS

SUMMARY

References

CHAPTER 2. SKIN FLAP PHYSIOLOGY

Abstract

INTRODUCTION

PHYSIOLOGIC CHARACTERISTICS OF SKIN

NEUROVASCULAR SUPPLY TO LOCAL SKIN FLAPS

VASCULAR DESIGN OF COMMON LOCAL SKIN FLAPS IN THE HEAD AND NECK

PHYSIOLOGIC CHANGES AFTER SKIN FLAP ELEVATION

WOUND HEALING

ATTEMPTS TO ALTER SKIN FLAP VIABILITY

IMPAIRED FLAPS
