**DESCRIPTION:**

Covering nearly 260 of the most common dermatologic conditions from A to Z, Treatment of Skin Disease, 6th Edition, by Drs. Mark G. Lebwohl, Warren R. Heymann, Ian Coulson, and Dedee Murrell, is your go-to resource for authoritative, evidence-based treatment strategies in your daily practice. This award-winning text provides guidance on the fast-moving dermatological therapy options for virtually any skin disease you're likely to encounter, including third-line and unusual therapies when initial options have not been successful. Summaries of each treatment strategy are accompanied by detailed discussions of treatment choices, with ratings on a consistent scale ranging from clinical studies to anecdotal reports.

- Puts every possible therapeutic option at your disposal - including management strategies, first- to third-line therapies, and off-label uses - for a truly complete guide to the vast array of dermatologic treatment options.
- Features 4 all-new chapters on COVID-19 dermatoses, including the associated pediatric multisystem inflammatory syndrome DRESS syndrome keratosis lichenoides chronica and tinea corporis and tinea cruris.
- Presents information in a consistent, tabular format, with checklists of diagnostic and investigative pearls and color-coded boxes for quick reference.
- Provides more than 260 full-color clinical images of skin diseases, most of which are new to this edition.
- Offers the combined knowledge and expertise of the world's leading authorities in dermatology.
