DESCRIPTION:

Covering a broad range of topics with side-by-side radiographic images, Multimodal Imaging Atlas of Cardiac Masses provides basic-to-advanced clinical tips on the use, clinical applications, and interpretation of cardiac imaging for cardiac masses. Written by a team of international experts in cardiac imaging, cardiac pathology, and cardiac surgery, this title features separate chapters on imaging modalities, anatomic pitfalls, cardiac thrombus, benign tumors, infectious lesions, and malignant tumors. This practical title is an essential guide for cardiologists, interventional cardiologists, cardiac surgeons, radiologists, and others to recognize the typical features of these uncommon conditions and to formulate team-based treatment plans for these complex patients.

Key Features:

- Covers multimodal cardiac imaging depicting all types of cardiac masses.
- Includes anatomic pitfalls, artifacts, differential diagnoses, and metastasis.
- Features 600 figures and 100 video clips of cardiac imaging, including echocardiography, CT, CMR, and PET, with photos of histopathologic findings and masses after surgery.
- Includes important clinical points on interpretation and differentiation of benign tumors, malignant tumors, and artifacts.

Author Information

Edited by **Azin Alizadehasl**, MD, FACC, FASE, Professor of Cardiology and Echocardiologist, Head of Cardio-Oncology Department & Research Center, Rajaie Cardiovascular Medical & Research Center, Tehran, Iran and **Majid Maleki**, MD, FACC, FESC, FAPSC, Professor of Cardiology, Shaheed Rajaei Cardiovascular, Medical & Research Center, Vali- Asr Avenue Tehran- Iran

CONTENTS:

1. History and Physical Examination of Different Cardiac Masses
2. Multimodality Imaging for Diagnosis of Cardiac Masses
3. Imaging Pitfalls, Artifacts and Anatomical Variants Mimicking Cardiac Masses
4. Electrocardiography (ECG) and Cardiac Masses
5. Angiography Clues of Cardiac Masses
6. Cardiac Thrombus and Imaging Modalities (Diagnosis, Approach and follow-up)
7. Infectious Lesions Mimicking Cardiac Masses
8. Echocardiography in Benign Cardiac Tumors (Diagnosis, Approach and follow-up)
9. Echocardiography in Malignant Cardiac Tumors (Diagnosis, Approach and follow-up)
10. Contrast Echocardiography in Cardiac Masses
11. CT in Benign Cardiac Tumors (Diagnosis, Approach and follow-up)
12. CT in Malignant Cardiac Tumors (Diagnosis, Approach and follow-up)
13. CMR in Benign Cardiac Tumors (Diagnosis, Approach and follow-up)
14. CMR in Malignant Cardiac Tumors (Diagnosis, Approach and follow-up)
15. PET in Benign Cardiac Tumors (Diagnosis, Approach and follow-up)
16. PET in Malignant Cardiac Tumors (Diagnosis, Approach and follow-up)
17. Benign Masses Macroscopic, Microscopic and Molecular Evaluation
18. Malignant Masses Macroscopic, Microscopic and Molecular Evaluation
19. Surgical Features of Benign Cardiac Tumors
20. Surgical Features of Malignant Cardiac Tumors
21. Differential Diagnosis of Cardiac Masses by Operation View
22. Oncologic Essentials in Benign Cardiac Masses (Approach and follow-up)
23. Oncologic Essentials in Malignant Cardiac Masses (Approach and follow-up)
24. Primitive Cardiac Lymphoma
25. Pericardial Masses
26. Anesthetic Considerations in Cardiac Masses
27. Other Masses with Differential Diagnosis of Cardiac Tumors
28. Fossa Ovalis, Patent Foramen Ovale and Cardiac Masses
29. Introduction to Interventional Radiology in Cardiac Masses
30. Minimal Invasive Surgery in Cardiac Masses
31. Cardiac Masses in Fetal Echocardiography
