DESCRIPTION:

Offering a clear and consistent framework for recognition, diagnosis, and treatment of a wide range of cardiac arrhythmia disturbances, *Clinical Cardiac Electrophysiology: A Practical Guide* covers the fundamental analytical skills needed in this challenging area. This portable, highly accessible handbook focuses on the basics of clinical electrophysiology_ how and when to perform an electrophysiology study as well as principles of ablation and other invasive therapies_ all in a succinct and modern format.

Key Features:

- Focuses on using an effective, consistent, decision-making process in recognizing, diagnosing, and treating rhythm disturbances of the heart, including supraventricular tachycardias, atrial fibrillation, ventricular tachycardias, and other rapid or irregular heartbeats.
- Covers anatomic fundamentals of cardiac structures, clinical indications for electrophysiology studies, practicalities and methodology of performing an electrophysiology study, and problems encountered during the procedure.
- Includes quick clinical summaries and more than 180 illustrations: electrophysiology recordings, ECGs, cardiac anatomy, radiographic images, and electroanatomic maps.
- Discusses key topics such as mechanisms of arrhythmias, conventional and electroanatomic mapping systems, fundamentals of cardiac mapping, biophysics of catheter ablation, and much more.
- Offers real-world guidance on contemporary practice from leading cardiac electrophysiologists Drs. Demosthenes G Katritsis and Fred Morady, with input from a multinational team of electrophysiology fellows and cardiologists.
- Ideal as a stand-alone resource or used in conjunction with Dr. Douglas Zipes'" renowned textbook, *Cardiac Electrophysiology: From Cell to Bedside*.
- Enhanced eBook version included with purchase. Your enhanced eBook allows you to access all of the text, figures, and references from the book on a variety of devices.

Author Information:

By **Demosthenes G Katritsis**, MD, PhD, FRCP, FESC, FACC, Director, Department of Cardiology, Hygeia Hospital, Athens, Greece Honorary Consultant Cardiologist, St Thomas Hospital London, UK Adjunct Assistant Professor of Cardiology, Johns Hopkins University School of Medicine, Baltimore, Maryland, USA and **Fred Morady**, MD, McKay Professor of Cardiovascular Disease, Professor of Medicine, University of Michigan Medical School, Ann Arbor, Michigan

CONTENTS:

Chapter 1. Classification of Arrhythmias

Chapter 2. Electrophysiologic Mechanisms of Arrhythmogenesis

Normal excitation of the heart

Mechanisms of arrhythmias

Chapter 3. Cardiac Anatomy for the Electrophysiologist

Left Atrium

Right Atrium

Right and Left Ventricle

Cardiac Valves

The Conduction System

Chapter 4. Vascular Access and Catheters

Patient Preparation

Epicardial access

Catheter Placement

Exposure to Radiation During EP Procedures

Chapter 5. Electrophysiology Hardware

Electrode catheters

Sheaths
Electrogram Recording and Processing
Pacing

Chapter 6. Basic Intervals and Atrial and Ventricular Conduction Curves

Basic Intervals
AV Conduction Curves
VA conduction Curves

Chapter 7. Electroanatomic Mapping and Robotic Navigation

Electroanatomic Mapping Systems
Robotic Navigation

Chapter 8. Physics of Ablation

Radiofrequency ablation
Cryoablation
LASER Ablation
Pulsed Field Ablation
Stereotactic Cardiac Radioablation

Chapter 9. Investigation of Bradycardias

Sinus Bradycardia
Atrioventricular Block
Atrioventricular Dissociation
Intraventricular Block
Electrophysiologic Testing for the Investigation of Bradycardias

Chapter 10. Differential Diagnosis of Narrow-QRS Tachycardias

Regular Narrow-QRS (=120 ms) Tachycardias
Irregular Narrow-QRS (=120 ms) Tachycardias

Chapter 11. Differential Diagnosis of Wide-QRS Tachycardias

Regular Wide-QRS (>120 ms) Tachycardias
Irregular Wide-QRS (>120 ms) Tachycardias

Chapter 12. Diagnosis and Catheter Ablation of Atrial Tachycardias

Atrial Premature Beats
Sinus Tachycardias
Focal Atrial Tachycardia
Multifocal Atrial Tachycardia
Macro-reentrant Atrial Tachycardias

Chapter 13. Diagnosis and Catheter Ablation of Atrial Fibrillation

Definitions and Classification
Electrophysiologic Mechanisms
Diagnosis
Catheter Ablation

Chapter 14. Diagnosis and Catheter Ablation of Atrioventricular Junctional Tachycardias

Atrioventricular Nodal Reentrant Tachycardia
Non-reentrant Junctional Tachycardias
Junctional Ectopic Beats

Chapter 15. Diagnosis and Catheter Ablation of Wolff-Parkinson-White Syndrome and Atrioventricular Tachycardias

Definitions
Electrophysiology and classification of accessory pathways
Diagnosis
Risk stratification in patients with asymptomatic preexcitation
Catheter ablation

Chapter 16. Diagnosis and Catheter Ablation of Ventricular Tachycardias

Definitions
Electrophysiologic Mechanisms
Diagnosis
Electrophysiology Testing
Catheter ablation
Clinical Forms of Ventricular Arrhythmias
