

PRACTICAL CARDIOLOGY, Principles and approaches

Autor: Maleki

ISBN: 9780323809153

Páginas: 832

Año: 2021

Edición: 2

Idioma: Ingles

Disponible: De 7 a 10 Días

Precio: ~~115.00~~ 109.25 Iva no incluido

DESCRIPTION:

From basic clinical facts to new advanced guidelines, Practical Cardiology: Principles and Approaches covers all aspects of cardiology in one quick and current resource. Packed with useful tips and step-by-step guidance, this updated second edition reviews new drugs, new invasive and noninvasive therapeutic approaches, and new developments in cardiology foundations, imaging modalities, management approaches, and specific interventions for all common cardiovascular disease modalities in all patient care settings.

Key Features:

- Offers practical plans of action for all major cardiovascular topics and diseases.
- Includes three new chapters on electrophysiology (including tracing interpretation) mechanisms, diagnoses, and therapies and hypotension, syncope, and sudden cardiac death.
- Features updated and expanded content throughout, including new findings, non-ST elevation in specific populations (elderly, women), diabetes in heart disease, and more.
- Provides integrated key points that offer quick clinical summaries for all aspects of common cardiovascular conditions.
- Contains more than 125 full-color illustrations with many algorithms of diagnostic and therapeutic pathways.

Author Information:

Edited by **Majid Maleki**, MD, FACC, FESC, FAPSC, Professor of Cardiology, Shaheed Rajaei Cardiovascular, Medical & Research Center, Vali- Asr Avenue Tehran- Iran **Azin Alizadehasl**, MD, FACC, FASE, Professor of Cardiology and Echocardiologist, Head of Cardio-Oncology Department & Research Center, Rajaie Cardiovascular Medical & Research Center, Tehran, Iran and **Majid Haghjoo**, MD, FESC, FACC, Professor, Cardiac Electrophysiologist, Department of Cardiac Pacing and Electrophysiology, Rajaie Cardiovascular Medical and Research Center, Tehran, Iran

CONTENTS:

- Chapter 1: Evidence Based Cardiology Practice
- Chapter 2: Evaluation of Patient with Cardiovascular Problem
- Chapter 3: Electrocardiography
- Chapter 4: Exercise Stress Testing
- Chapter 5: Echocardiography
- Chapter 6: The Chest Radiography in Cardiovascular Disease
- Chapter 7: Cardiac CT Scan
- Chapter 8: Cardiac Magnetic Resonance
- Chapter 9: Nuclear Cardiology
- Chapter 10: Catheterization and Angiography
- Chapter 11: Hemodynamic Study
- Chapter 12: Heart Failure and Pulmonary Hypertension
- Chapter 13: Tachyarrhythmias
- Chapter 14: Cardiac Implantable Electronic Devices
- Chapter 15: Bradyarrhythmias
- Chapter 16: Electrophysiology: Tracing Interpretation - NEW CHAPTER
- Chapter 17: Electrophysiology: Mechanisms, Diagnoses, and Therapies for Cardiac Arrhythmias - NEW CHAPTER
- Chapter 18: Electrophysiology: Hypotension, Syncope, and Sudden Cardiac Death - NEW CHAPTER
- Chapter 19: Preventive Cardiology
- Chapter 20: Hypertension
- Chapter 21: Dyslipidemia
- Chapter 22: ST Elevation Myocardial Infarction
- Chapter 23: Percutaneous Coronary Intervention
- Chapter 24: Transcatheter Therapies for Structural Heart Disease
- Chapter 25: Aortic Disorders and Their Management
- Chapter 26: Peripheral Artery Disease
- Chapter 27: Cardiomyopathies and Myocarditis
- Chapter 28: Valvular Heart Disease
- Chapter 29: Infective Endocarditis
- Chapter 30: Pericardial Disease
- Chapter 31: Congenital Heart Disease
- Chapter 32: Venous Thromboembolism
- Chapter 33: Cardiovascular Genetics
- Chapter 34: Renal Disorders and Cardiovascular Disease
- Chapter 35: Endocrine Disorder and Cardiovascular System
- Chapter 36: Heart and Pulmonary Diseases
- Chapter 37: Cardiovascular Drugs and Hemostasis
- Chapter 38: Stable Ischemic Heart Disease
- Chapter 39: Anesthesia and Sedation in Cardiac Patients
- Chapter 40: Principles of Cardiovascular Surgery
