| Precio: | 217.00 206.15 | Iva no incluido |

DESCRIPTION:

Thoroughly revised to reflect new advances in the field, Savage & Aronson's Comprehensive Textbook of Perioperative and Critical Care Echocardiography, Third Edition, remains the definitive text and reference on transesophageal echocardiography (TEE). Edited by Drs. Alina Nicoara, Robert M. Savage, Nikolaos J. Skubas, Stanton K. Shernan, and Christopher A. Troianos, this authoritative reference covers material relevant for daily clinical practice in operating rooms and procedural areas, preparation for certification examinations, use of echocardiography in the critical care setting, and advanced applications relevant to current certification and practice guidelines.

- Contains significantly expanded content on the use of TEE and transthoracic echocardiography (TTE) in the critical care setting_more than twice the material offered in the previous edition and ideal for Critical Care Echocardiography certification preparation
- Features new chapters on transcatheter procedures
- Includes up-to-date information on organizing education and training in perioperative echocardiography and on ultrasound for vascular access, assessment of the patient with endocarditis and using echo during resuscitation, epiaortic and epicardial imaging endovascular management of thoracic vascular disease, transcutaneous management of valvular heart disease, and more
- Chapters provide key point summaries and review questions and answers throughout, making it an excellent tool for study and review

Enrich Your eBook Reading Experience:

- Read directly on your preferred device(s), such as computer, tablet, or smartphone.
- Easily convert to audiobook, powering your content with natural language text-to-speech.

CONTENTS:

SECTION I: Fundamentals of Perioperative Echocardiography

1. Physics of Ultrasound
2. Doppler Echocardiography
3. Imaging Artifacts and Diagnostic Pitfalls
4. Optimizing Two-Dimensional and Three-Dimensional Echocardiographic Images
5. Surgical Anatomy of the Heart
6. Comprehensive and Basic Perioperative TEE Examination
7. Indications for Intraoperative Transesophageal Echo
8. Organization of a Perioperative Echocardiographic Service: Personnel, Equipment, Maintenance, Safety, Infection, Economics, and Continuous Quality Improvement
9. Education and Training in Perioperative Echocardiography
10. Assessment of Global Left Ventricular Systolic Function
11. Regional Left Ventricular Systolic Function
12. Assessment of Right Ventricular Function
13. Assessment of Diastolic Function in the Perioperative Setting
14. Assessment of the Mitral Valve
15. Assessment of the Aortic Valve
16. Assessment of the Tricuspid and Pulmonic Valves
17. Prosthetic Heart Valves
18. Assessment of Cardiac Masses
19. Pericardial Diseases

SECTION II: Advanced Perioperative Applications of Echo-cardiography in Cardiothoracic Surgery

20. Cannulation and Perfusion Strategies for Cardiopulmonary Bypass
21. Epiaortic and Epicardial Imaging

22. Assessment of Perioperative Hemodynamics
23. Assessment and Surgical Considerations in Ischemic/Functional Mitral Valve Surgery
24. Surgical Considerations and Assessment in Nonischemic Mitral Valve Surgery
25. Assessment and Surgical Considerations in Aortic Valve Surgery
26. Assessment and Surgical Considerations During Open and Endovascular Thoracic Aortic Surgery
27. The Assessment of a Patient With Endocarditis
28. Hemodynamic Assessment While Weaning Off Cardiopulmonary Bypass
- SECTION III: Advanced Perioperative Applications of Echocardiography in End-Stage Heart and Lung Failure**
29. Echocardiographic Assessment of Cardiomyopathies
30. Assessment and Surgical Consideration in Pericardiectomy
31. Assessment and Surgical Considerations in Cardiac Transplantation
32. Assessment and Surgical Considerations in Lung and Heart-Lung Transplantation
- SECTION IV: Advanced Perioperative Applications of Echocardiography in Structural Heart Disease**
33. Assessment and Procedural Considerations During Transcatheter Aortic Valve Replacement
34. Assessment and Considerations During Left Atrial Appendage Closure Procedures
35. Assessment and Considerations During Transcatheter Mitral Valve Procedures
36. Assessment and Considerations During Transcatheter Tricuspid Valve Repair and Replacement
37. Assessment and Considerations for Atrial Septal Defect Closure
- SECTION V: Advanced Perioperative Applications of Echocardiography During Electrophysiologic Procedures**
38. Procedural Intracardiac Ultrasound Imaging in Ablation of Arrhythmias
39. Insertion of Rhythm Management Devices and Cardiac Resynchronization Therapy
40. Transvenous Lead Extraction
- SECTION VI: Diagnostic Echocardiography and Ultrasound in Critical Care Settings**
41. Overview of Transesophageal Echocardiography and Transthoracic Echocardiography in Critical Care
42. Hemodynamic Assessment of the Critically Ill Patient
43. Rescue Echocardiography in the Unstable Patient
44. Acute and Chronic Pulmonary Hypertension
45. Assessment of the Lung and Thoracic Cavity in ICU
46. Assessment of Acute Kidney Injury and Renal Function
47. Vascular Access
48. Procedural Access in the Intensive Care Unit
- SECTION VII: Echocardiography in Noncardiac Settings**
49. Transesophageal Echocardiography for Nonthoracic Transplants
50. Intraoperative Imaging of the Inferior Vena Cava and Hepatic Vein by Transesophageal Echocardiography
