Precio: 78.78 74.84	Iva no incluido

DESCRIPTION:

Dermatology is a visual discipline where observation to detail is key to accurate diagnosis, especially in children. This book for clinicians provides a clear and easy guide to identify skin diseases in children with coloured skin. It discusses more than 200 skin problems with over 300 colour illustrations following a logical organisation with picture-based Q&A at the end. It features skin problems specific to children such as haemangiomas, congenital naevi, neurocutaneous syndromes, napkin rash, etc. as well as those also seen in adults such as psoriasis, lichen planus, and eczema. Also covers tropical diseases such as cutaneous tuberculosis, leishmaniasis, fungal infections, and leprosy.

- Key features: 1. Highlights the differences in clinical presentation in children having coloured skin.
- Key features: 2. Stimulates the interest in tropical dermatology and skin problems in coloured skin, among medical students, trainees, general practitioners, paediatricians, and dermatologists.
- Key features: 3. Features high quality illustrations and concise, practical text for accurate diagnosis and effective treatment.

CONTENTS:
