DESCRIPTION:

Extensively revised from cover to cover, Kendig and Wilmott's Disorders of the Respiratory Tract in Children, 10th Edition continues to be your #1 choice for reliable, up-to-date information on all aspects of pediatric respiratory disorders. This highly respected reference is accessible to specialists and primary care providers alike, with coverage of both common and less common respiratory problems found in the newborn and child. Detailed and thorough, this edition covers basic science and its relevance to today's clinical issues as well as treatment, management, and outcomes information, making it an ideal resource for day-to-day practice as well as certification or recertification review and other professional examinations such as pHERMES.

Key Features:

- Offers an international perspective on the whole spectrum of the specialty, including a robust video library with demonstrations of key procedures and bronchoscopic views.
- Uses a consistent format with succinct, bulleted text, and contains abundant tables and figures, chapter summaries, and more than 500 full-color images to convey key information in an easy-to-digest manner.
- Contains eleven new chapters and discusses timely topics such as big data and -omics in respiratory disease, COVID-19, obesity and its consequences, and vaping and nicotine addiction among children and young people.
- Provides up-to-date instruction on key procedures, such as bronchoscopy and pulmonary function testing.
- Highlights the knowledge and expertise of nearly 90 new authors who are global experts in the fields of pediatrics, pulmonology, neurology, microbiology, cardiology, physiology, diagnostic imaging, critical care, otolaryngology, allergy, and surgery.
- An eBook version is included with purchase. The eBook allows you to access all of the text, figures and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud.

CONTENTS:

- 1 Molecular Determinants of Lung Morphogenesis
- 2 Basic Genetics and Epigenetics of Childhood Lung Disease
- 3 Big data and omics in respiratory diseases: an analytical perspective
- 4 The Surfactant System
- 5 The Structural and Physiologic Basis of Respiratory Disease
- 6 Biology and Assessment of Airway Inflammation
- 7 Lung Defenses: Intrinsic, Inate and adaptive
- 8 Monitoring the child: history and physical examination, novel remote monitoring strategies
- 9 Bronchoscopy and Bronchoalveolar Lavage in Pediatric Patients
- 10 Diagnostic Imaging of the Respiratory Tract
- 11 Pulmonary Function Tests in Infants and Preschool Children
- 12 Exercise and Lung Function in child health and disease
- 13 Integrating Patient reported outcomes into research and clinical practice: Measures of Health-Related Quality of Life and Mental Health
- 14 Bronchoscopy and Bronchoalveolar Lavage in Pediatric Patients ASSESSING FOR MALACIA IN AERODIGESTIVE
- 14 Diagnostic Imaging of the Respiratory Tract INCLUDE DYNAMIC MRI AND LYMPHANGIOGRAPHY
- 14 Exercise and Lung Function in child health and disease
- 14 Aerosol Therapy in Children
- 15 Physical Therapies in Pediatric Respiratory Disease
- 16 Children Dependent on Respiratory Support: invasive and non-invasive ventilation
- 17 Children Dependent on Respiratory Support: oxygen, and invasive and non-invasive ventilation
- 17 Microbiological Diagnosis of Respiratory Illness: Recent advances
- 18 Integrating Patient reported outcomes into research and clinical practice
- 18 Microbiological Diagnosis of Respiratory Illness: Recent advances
- 18 Transition from Pediatric to Adult Care
- 19 Long Term Consequences of Childhood Respiratory Disease
- 20 Pediatric Lung Transplantation
- 21 Congenital Lung Disease
- 22 Respiratory Disorders in the Newborn
- 23 Bronchopulmonary Dysplasia
- 24 Acute Infections that produce upper airway obstruction
- 25 Bronchiolitis
- 26 Respiratory Disorders in the Newborn
- 26 Bronchopulmonary Dysplasia
- 26 Acute Infections that produce upper airway obstruction
- 26 Bronchiolitis
- 26 Pneumonia in Children and its complications
- 27 Novel Respiratory Disease (Include Covid)
- 28 Tuberculosis
- 29 Nontuberculous Mycobacterial Disease
- 30 The Mycoses
- 31 Non - Tuberculosis Mycobacterial Disease
- 31 Pertussis and Other Bordetella Infections of the Respiratory Tract
- 32 Parasitic Infections Affecting the Lung Infections (Toxocariasis, Hydatid Disease of the Lung, Strongyloidiasis, and Pulmonary Paragonimiasis)
- 33 The Epidemiology of Asthma
- 34 The Immunopathogenesis of Asthma

- 35 Asthma in the Preschool Age Child
- 36 Pertussis and Other Bordetella Infections of the Respiratory Tract
- 36 Wheezing in Older Children: Asthma
- 37 Severe Asthma (include monoclonals and upper airway as a comorbidity)
- 38 Genetics and Pathophysiology of Cystic Fibrosis
- 39 Diagnosis and Presentation of Cystic Fibrosis
- 40 Pulmonary Disease in Cystic Fibrosis
- 41 Non-Pulmonary Manifestations of Cystic Fibrosis
- 42 Modern Molecular Therapies for Cystic Fibrosis
- 43 Primary Ciliary Dyskinesia and other cilopathies
- 44 Persistent bacterial bronchitis and bronchiectasis
- 45 New Concepts in Children's Interstitial Lung Disease and Diffuse Lung Disease
- 46 Rare and new childhood Lung Disorders
- 47 Childhood Interstitial Lung Disease Disorders More Prevalent in Infancy
- 48 Lung Diseases Associated with Disruption of Pulmonary Surfactant Homeostasis
- 49 Pulmonary Involvement in the Systemic Diseases of Childhood
- 50 Lung Injury Caused by Pharmacologic Agents
- 51 Diffuse Alveolar Hemorrhage in Children
- 52 Hypersensitivity Pneumonitis and Eosinophilic Lung Diseases
- 53 Primary Immunodeficiency: and other Diseases with Immune Dysregulations
- 54 Pulmonary Disease in the Immunosuppressed Pediatric Patient (include complications of solid organ and stem cell transplant)
- 55 Respiratory disorders in pediatric HIV infected children and adolescents
- 56 Diffuse Alveolar Hemorrhage in Children
- 56 Hypersensitivity Pneumonitis and Eosinophilic Lung Diseases
- 56 Pulmonary embolism and thromboembolic disease
- 57 Childhood Pulmonary Arterial Hypertension
- 58 Pulmonary arteriovenous malformations
- 59 Pulmonary lymphatic disease
- 60 The Aerodigestive Model
- 61 Pulmonary lymphatic disease RISHI PABARY, RBH
- 61 Aspiration Feeding Swallowing and Voice Disorders
- 61 Aspiration Feeding and Swallowing Disorders
- 62 Gastroesophageal Reflux Disease and Eosinophilic Esophagitis in Children with Complex Airway Disease
- 63 Laryngeal and Tracheal Airway Disorders
- 64 Basic physiology of sleep
- 65 Testing for sleep disordered breathing
- 66 OSA in children
- 67 Complex sleep disorders in children include CCHS and other hypoventilation syndromes in "Complex sleep disorders in children"
- 68 Sudden Infant Death Syndrome and apparent life threatening events
- 69 Principles of invasive and non-invasive mechanical ventilation
- 70 Acute Respiratory Distress Syndrome
- 71 Pulmonary Edema
- 72 Lung Injury From external insults: Hydrocarbon Aspiration and Smoke Inhalation trauma and drowning
- 72 Lung Injury From external insults: Hydrocarbon Aspiration
- 73 Drowning
- 74 Trauma to the Respiratory Tract
- 74 Smoke Inhalation
- 75 Respiratory Complications of Intensive Care
- 76 Pulmonary disease associated with Congenital Heart disease
- 77 The Lung in Sickle Cell Disease
- 78 Respiratory complication of Down Syndrome and other genetic syndromes
- 78 Tumors of the Chest
- 80 Neurological and Chest wall disease
- 81 Air/ Fluid in the Pleural Space and Atelectasis
- 82 Environmental contributions to respiratory disease in children
- 83 Nicotine and the lung: tobacco, e-cigarettes
