

## HANDBOOK OF DIALYSIS THERAPY

**Autor:** Nissenson

**ISBN:** 9780323791359

**Páginas:** 944

**Año:** 2022

**Edición:** 6

**Idioma:** Ingles

**Disponible:** De 7 a 10 Días

**Precio:** ~~110.99~~ 105.44 Iva no incluido

**DESCRIPTION:**

Edited and written by top experts and pioneers in dialysis, Handbook of Dialysis Therapy, 6th Edition, provides the entire dialysis team with a comprehensive overview of this growing field. It covers traditional and advanced procedures, what pitfalls to expect and how to overcome them, and how best to treat various patient populations—all with a practical approach that can be directly applied to patient care. This must-have resource has been updated with the latest cutting-edge technology, dialysis techniques, and complications related to various diseases for both pediatric and adult patients.

Explains complex dialysis concepts through abundant diagrams, photos, line drawings, and tables, while its readable, hands-on approach allows for quick review of key information.

Covers both adult and pediatric patients in detail, and offers guidance on special populations such as the geriatric patient and the chronically ill.

Features increased content on home-based dialysis modalities, new alternatives for establishing vascular access for hemodialysis, new protocols for reducing the risk of infection and complications, and advancements in establishing and managing peritoneal dialysis.

Includes extensive pediatric content such as prevention and treatment of bone disease, management of anemia, assessment of quality of life in pediatric patients undergoing dialysis, and immunizations in children undergoing dialysis.

Defines the quality imperatives, roles, and responsibilities of dialysis facility medical directors and attending nephrologists.

Updates nephrologists on the latest alternative dialysis modalities.

Enhanced eBook version included with purchase. Your enhanced eBook allows you to access all of the text, figures, and references from the book on a variety of devices.

**CONTENTS:**

- 1 Demographics of the End-Stage Renal Disease Patient
- 2 Uremic Toxicity
- 3 Initiation of Dialysis Therapy
- 4 Urea Kinetic Modeling for Guiding Hemodialysis Therapy in Adults
- 5 The Dialysis Prescription
- 6 Selecting a Dialyzer: Technical and Clinical Considerations
- 7 Water Treatment Equipment for In-Center Hemodialysis
- 8 Dialysate Composition
- 9 Safety Monitors in Hemodialysis
- 10 Methods of Hemodialysis Anticoagulation
- 11 Common Clinical Problems During Hemodialysis
- 12 Hemofiltration and Hemodiafiltration
- 13 Wearable Artificial Kidney
- 14 Home Preparation and Installation for Home Hemodialysis
- 15 Arteriovenous Access for Hemodialysis in Adults
- 16 Cannulation of Arteriovenous Vascular Access: Science and Art
- 17 Central Venous Access for Hemodialysis
- 18 Non-Infectious Complications from Vascular Access
- 19 Infectious Complications from Vascular Access
- 20 Determination of Continuous Ambulatory Peritoneal Dialysis and Automated Peritoneal Dialysis Prescriptions
- 21 Peritoneal Dialysis Cyclers and Other Mechanical Devices
- 22 Peritoneal Dialysis Solutions
- 23 Solute Management with PD
- 24 Volume Management with Peritoneal Dialysis
- 25 Peritoneal Access Devices, Placement Techniques, and Maintenance
- 26 Peritoneal Catheter Exit-Site and Tunnel Infections
- 27 Peritonitis in Peritoneal Dialysis
- 28 Abdominal Hernias in Continuous Ambulatory Peritoneal Dialysis
- 29 Dialysate Leaks
- 30 Hydrothorax and Peritoneal Dialysis
- 31 Abdominal Catastrophes, Peritoneal Eosinophilia, and Other Unusual Events in Peritoneal Dialysis
- 32 Metabolic Complications of Peritoneal Dialysis
- 33 Peritoneal Membrane Dysfunction: Inadequate Solute Removal, Ultrafiltration Failure and Encapsulating Peritoneal Sclerosis
- 33 Acid-Base Homeostasis in Dialysis
- 34 Nutritional Management of Hemodialysis Patients
- 35 Intradialytic Parenteral Nutrition and Intraperitoneal Nutrition
- 36 Nutritional Management in Peritoneal Dialysis
- 37 Anemia and Its Treatment in ESKD Patients
- 38 Resistance to Erythropoiesis Stimulation Agent (ESA) Treatment
- 39 Chronic Kidney Disease-Mineral and Bone Disorder
- 40 Phosphate Management in Patients With End-Stage Renal Disease
- 41 Use of Vitamin D Sterols and Calcimimetics in Patients of ESRD

- 42 Parathyroidectomy
- 43 Acquired Cystic Kidney Disease
- 44 The Challenges of Blood Pressure Control in Dialysis Patients
- 45 Arrhythmias in Hemodialysis Patients
- 46 Management of Ischemic Heart Disease, Heart Failure, and Pericarditis in Hemodialysis Patients
- 47 Avoidance and Treatment of Cardiovascular Disease in Dialysis
- 48 Management of Dyslipidemia in Long-Term Dialysis Patients
- 49 END-STAGE KIDNEY FAILURE IN THE DIABETIC PATIENT
- 50 Care of Elderly Dialysis and End-Stage Kidney Disease Patients
- 51 Liver Disease and Gastrointestinal Disorders in Dialysis Patients
- 52 Abnormalities of Thyroid Function in Chronic Dialysis Patients
- 53 Care of the HIV-Infected Dialysis Patient
- 54 COVID-19 and Dialysis Patients
- 55 Psychosocial Issues in Dialysis Patients
- 56 Evaluation and Treatment of Sexual Dysfunction
- 57 Pregnancy in Dialysis Patients
- 58 Principles of Drug Usage in Dialysis Patients
- 59 Medication Management
- 60 Physical Activity, Function, and Exercise-based Rehabilitation for people on Dialysis
- 61 Physical, Psychosocial, and Vocational Rehabilitation of Patients Undergoing Long-Term Dialysis
- 62 Preventative Care in End-Stage Renal Disease
- 63 Ethical Considerations in the Care of Dialysis Patients: The New Paradigm
- 64 Improving Outcomes for End-Stage Renal Disease Patients: Shifting the Quality Paradigm
- 65 Quality, Safety, Accountability, and Medical Director Responsibilities
- 66 Application of Telemedicine to Patients with End-State Renal Disease
- 67 Convective Renal Replacement Therapies for Acute Kidney Injury
- 68 Anticoagulation for Continuous Renal Replacement Therapy (CRRT)
- 68 Vascular Access and PD Placement in Children
- 69 Treatment of Poisoning with Extracorporeal Methods
- 70 Vascular Access and PD Placement in Children
- 71 Infant Hemodialysis
- 72 Urea Kinetic Modeling for Hemodialysis Prescription in Children
- 72 Vascular Access and PD Placement in Children
- 73 Alternative HD Prescriptions in Children
- 74 Anticoagulation in Children Undergoing Hemodialysis, Continuous Renal Replacement Therapy or Apheresis Therapy
- 75 Prescribing Peritoneal Dialysis in Children
- 76 Nutritional Management of Children Undergoing Peritoneal Dialysis
- 77 Peritoneal Dialysis in Neonates and Infants
- 78 Dialysis in Inborn Errors of Metabolism
- 79 Neurocognitive Development in Children Undergoing Dialysis
- 80 Growth in Children with End-Stage Renal Disease
- 81 Adequacy of Peritoneal Dialysis/ Assessing Peritoneal Function in Pediatric Patients
- 82 Continuous Renal Replacement Therapy in Pediatric Patients
- 83 Prevention and Treatment of Bone Disease in Pediatric Dialysis Patients
- 84 Management of Anemia in Children Undergoing Dialysis
- 85 Prevention and Treatment of Cardiovascular Complications in Children Undergoing Dialysis
- 86 Infectious Complications in Children Undergoing Dialysis
- 87 HIF-1 in the Treatment of Anemia in Kidney Patients
- 87 Caring for the Teenager in an Adult Unit
- 88 Use of Erythropoietic-Stimulating Agents in Hemodialysis Patients
- 88 Iron Use in End-Stage Renal Disease
