#### DESCRIPTION:

Developed at Philadelphia's world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis.

This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

The updated Retina volume includes:

- Expert, state-of-the-art guidance on the diagnosis and management of vitreoretinal diseases, ideal for practicing ophthalmologists, retinal specialists, fellows, and residents
- More than 400 high-quality images, including higher resolution spectral domain OCTs, high resolution digital fundus photos, and widefield imaging
- An easy-to-use format that covers Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management
