#### DESCRIPTION:

Developed at Philadelphia's world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis.

This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

The updated Cornea volume includes:

- Expert guidelines for the differential diagnosis and treatment of cornea diseases seen by the ophthalmic resident, general ophthalmologist, and cornea specialist
- Up-to-date information on infections and complications of corneal surgeries
- More than 450 high-quality photographs of important corneal, anterior segment, and external diseases, many new and updated for this fourth edition
- Revised coverage of the clinical features of key cornea and external eye diseases, diagnostic tests, differential diagnoses, and treatment
- 434 additional full-color photographs and drawings further illustrate pathology and therapeutics described in the text
