

GRIEVE'S MODERN MUSCULOSKELETAL PHYSIOTHERAPY

	Autor:	Falla
	ISBN:	9780702080890
	Páginas:	600
	Año:	2024
	Edición:	5
	Idioma:	Ingles
	Disponible:	De 7 a 10 Días
Precio:	141.99 134.89	Iva no incluido

DESCRIPTION:

Originally edited by Gregory Grieve, a founder of modern manual therapy, the fifth edition of Grieve's Modern Musculoskeletal Physiotherapy continues to offer contemporary evidence, models of diagnosis and practice that make this one of the most highly respected reference books for physiotherapists.

This edition has been fully updated to provide an overview of the latest science in a rapidly evolving field. It includes detailed directions for research-informed patient care for a range of musculoskeletal disorders, as well as up-to-date information on the global burden, research methodologies, measurements, and principles of assessment and management.

A new international editorial board, with experience in both research and clinical practice, bring a truly comprehensive perspective to this book, meaning those practising musculoskeletal physiotherapy today will find it highly clinically relevant to their work.

New to this edition:

- Global burden of musculoskeletal disorders - including history, epidemiology and new models of care
- A range of new research methodologies, including N of 1 research designs, systematic reviews and meta-analyses, population-based cohort studies, consensus research and response analyses in musculoskeletal research
- How to navigate the endless wave of information and assess different levels of evidence
- New measures
- New chapter on cost analyses and value-based care
- Digital rehabilitation methods

Key Features:

- Edited by an internationally recognised editorial board - brings expertise in both research and clinical practice
- Fully updated with the latest published evidence
- Clear guidance on evidence-based contemporary practice
- Management of conditions relating to both the vertebral column and peripheral joints
- Updated reviews on the science and practice of a wide range of treatment modalities
- Principles of effective communication, screening, clinical reasoning, lifestyle considerations, behavioural change and self-management
- Summary boxes and clinical tips to support clinical assessment and management
- More than 300 figures and illustrations

CONTENTS:

PART I Introduction

1.1 Introduction to the Text

PART II Global Burden of Musculoskeletal Disorders

2.1 Historic Management Perspectives

2.2 Epidemiologic Measures of Musculoskeletal Disorders

2.3 An Overview of Contributors to Pain and Disability

2.4 Biological Contributors to Musculoskeletal Pain and Disability

2.5 Psychological Contributors to Musculoskeletal Pain

2.6 Social Contributors to Pain and Disability

2.7 Musculoskeletal Models of Care

PART III Research Design and Navigating the Endless Wave of Information

3.1 What Is Information, and Where Are People Getting It From?

3.2 Information Credibility: Navigating the Endless Wave of Information

3.3 Levels of Evidence

SECTION 3.4 Research Design

- 3.4.1 Quantitative Research
- 3.4.2 Introduction To Qualitative Design
- 3.4.3 Mixed Methods Research
- 3.4.4 Living Evidence: Is the Randomised Controlled Trial the Missing Link?
- 3.4.5 N-of-1 Research Designs
- 3.4.6 Standardized Data Collection, Audit, and Clinical Profiling
- 3.4.7 Systematic Reviews: Informing Evidence-Based Practice
- 3.4.8 Why Are Population-Based Cohorts Important in Progressing Our Understanding of Musculoskeletal Pain Conditions?
- 3.4.9 Implementation Research
- 3.4.10 Consensus Research
- 3.4.11 Responder Analyses in Musculoskeletal Research

PART IV Measurements in Musculoskeletal Physiotherapy

- 4.1 Patient-Reported Outcome Measures in Musculoskeletal Physiotherapy
- 4.2 Patient-Reported Experience Measures
- 4.3 Physical Performance Measures
- 4.4 Assessing Cost Analyses and Value-Based Care in Rehabilitation

SECTION 4.5 Advances in Measurement

- 4.5.1 Quantitative Sensory Testing and Clinical Sensory Testing
- 4.5.2 Pain in the Brain: The Role and Future of Functional Neuroimaging
- 4.5.3 Advances in Magnetic Resonance Imaging Measures
- 4.5.4 Ultrasound in Musculoskeletal Practice
- 4.5.5 Surface Electromyography
- 4.5.6 Movement Analysis and Musculoskeletal Modeling
- 4.5.7 Electroencephalography
- 4.5.8 Transcranial Magnetic Stimulation

PART V Principles of Assessment and Management

- 5.1 Communication
- 5.2 Red Flags
- SECTION 5.3 Lifestyle and Health
- 5.3.1 Lifestyle and Musculoskeletal Health: Basis for a Health and Lifestyle Framework
- 5.3.2 Implementing a Health and Lifestyle Framework: Competencies for Musculoskeletal Physiotherapists
- 5.4 Clinical Reasoning and Models for Clinical Management
- 5.5 Consideration of Cognitive and Behavioral Influences on Physiotherapy Practice
- 5.6 Educational Approaches to Pain Management
- 5.7 Behavior Change and Self-Management
- 5.8 Hemodynamics and Clinical Practice
- 5.9 Neurodynamics
- 5.10 Neuromuscular Adaptations to Exercise
- 5.11 The Analgesic Effects of Exercise
- 5.12 Management of Sensorimotor Control in Musculoskeletal Disorders
- 5.13 Manual Therapy
- SECTION 5.14 Adjunct Modalities
- 5.14.1 Electrophysical Modalities
- 5.14.2 Acupuncture and Its Role in Musculoskeletal Pain and Rehabilitation
- 5.15 Digital Rehabilitation Methods
- 5.16 Advanced Practice in Physiotherapy

PART VI Region Specific Management

- 6.1 Idiopathic Neck Pain
- 6.2 Whiplash-Associated Disorders
- 6.3 Temporomandibular Disorders and Orofacial Pain
- 6.4 Thoracic Pain
- 6.5 Low Back Pain Examination and Treatment
- 6.6 Clinical Reasoning in Sacroiliac Joint and Pelvic Girdle Pain: A Tunnel Vision of Physiotherapy Experts?
- 6.7 The Shoulder
- 6.8 The Elbow
- 6.9 Wrist and hand
- 6.10 The Hip
- 6.11 Knee Conditions
- 6.12 Foot and Ankle
