

MANUAL OF HEAD AND NECK RECONSTRUCTION, A Step-by-Step Guide

Autor: Sokoya

ISBN: 9783031659980

Páginas: 414

Año: 2024

Edición: 1

Idioma: Ingles

Disponible: De 7 a 10 Días

Precio: ~~166.00~~ 157.70 Iva no incluido

DESCRIPTION:

This text will deliver revolutionary approaches to reconstructive surgery in a clear and consistent format. Head and neck reconstruction has long been thought to be a daunting, intimidating, and tedious field of surgery. Microvascular head and neck reconstruction is one of the most advanced surgical options available for reconstruction. It is used to treat defects created by removal of tissue in the larynx, pharynx, oral cavity, salivary glands, tongue, and skin. It is also utilized in combination with chemotherapy and radiation for the treatment of head and neck cancer. Due to the disfiguring nature of the removal of these tissues, microvascular reconstruction is important to return the face, head, and neck to as normal as possible. This text reviews cutting edge surgical skills in head and neck oncologic surgery and facial plastic and reconstructive surgery.

The Manual of Head and Neck Reconstruction will include step-by-step guides, with clear, illustrated, coverage of regional and distant cutaneous, muscular, osseous flaps, donor site harvest and transfer for head and neck reconstruction. The book will discuss relevant anatomy, nuances of flap design, harvesting techniques, inseting, ideal locations of flap use, and flap combinations. It will also discuss preoperative preparations, intraoperative considerations, techniques for avoiding pitfalls, and managing postoperative complications. There will be intraoperative pictures walking the audience through the surgeries in a detailed fashion, with the goal of imparting an efficient, effective surgical philosophy. Exclusively to this text, the topic of surgical maneuvers designed to improve surgical efficiency and save hours of intraoperative time, limiting patient's time under anesthesia, will be discussed.

This book was authored by experts in head and neck reconstruction trained by Dr. Yadro Ducic over the past 12 years. It is a great resource for many surgeons in the field of otolaryngology-head/neck surgery.

CONTENTS:**Facial Reconstruction**

Local Flaps

Facial Regional Flaps

Nasal Reconstruction

Patient-Specific Implants and Prosthetics

Reconstruction of the Lip

Muscular and Musculocutaneous Flaps

Pectoralis Major Flap

Anterolateral Thigh Free Flap

Free Rectus Flap Reconstruction

Fasciocutaneous Flaps

The Radial Forearm Free Flap

Cervicodeltopectoral Flap

Trapezius Flap for Head and Neck Reconstruction

Supraclavicular Flap

Osseous and Osteocutaneous Flaps and Grafts

The Free Fibula Flap

Scapular Free Tissue Transfer for Head and Neck Reconstruction

The Osteocutaneous Radial Forearm Free Flap

Nonvascularized Bone Harvest and Transfer

Facial Reanimation

Masseteric Nerve Transfer for Facial Reinnervation

Outpatient Periocular Reanimation

Static Facial Suspension with Fascia Lata

Functional Sterno-omohyoid Free Muscle Transfer for Facial Reanimation

Reconstruction of Congenital Defects

Unilateral Cleft Lip Repair

Cleft Palate Repair

Trauma Reconstruction

Mandible Trauma Reconstruction

Midface Trauma Reconstruction

Frontal Sinus Reconstruction

Orbital Trauma Reconstruction

Skull Base Reconstruction

Endoscopic Skull Base Reconstruction

Open (Anterior) Skull Base Repair
