

HOFFBRAND'S POSTGRADUATE HAEMATOLOGY

	Autor:	Mead
	ISBN:	9781119706618
	Páginas:	1104
	Año:	2025
	Edición:	8
	Idioma:	Ingles
	Disponible:	De 7 a 10 Días
	Precio:	225.95 214.65
		Iva no incluido

DESCRIPTION:

The latest edition of the key haematology text

Haematology, the study and treatment of blood and bone marrow disorders, is a rich and complex discipline that consistently produces cutting-edge medical research. Since 1972, Hoffbrand's Postgraduate Haematology has acted as the foundational overview and reference text for this subject, introducing generations of trainees and medical residents to the pathogenesis, clinical and laboratory features, and management of blood disorders.

The eighth edition of Hoffbrand's Postgraduate Haematology, now with a new editorial team including leading clinicians and researchers, promises to continue this tradition of excellence with a fully updated text. Lavishly illustrated, comprehensive, and thoughtfully referenced, it is an indispensable resource.

Readers of the eighth edition of Hoffbrand's Postgraduate Haematology will also find:

- Four-color illustrations and photomicrographs of blood cells and tissues throughout to support key topics
- New sections analysing recent advances in next generation sequencing, genome editing, clonal haematopoiesis, anticoagulant drugs, diagnostic laboratory tools, and more
- Companion website with downloadable figures and other tools

Hoffbrand's Postgraduate Haematology is ideal for all postgraduate trainees or residents in haematology, as well as for clinicians and practitioners looking for a reference work on the subject and a guide to the latest research.

CONTENTS:

Part I General principles of haematology

- 1 Human stem cells and haemopoiesis
- 2 Phagocytes
- 3 Erythropoiesis in the human
- 4 Lymphocyte development and function
- 5 The spleen
- 6 Cancer immunotherapy
- 7 Clinical applications of gene editing and therapy
- 8 Application of next-generation sequencing in haematology
- 9 The molecular basis of haematological malignancies
- 10 Laboratory diagnosis of haematological neoplasms

Part II Red blood cell disorders and blood transfusion

- 11 Iron metabolism iron deficiency and disorders of haem synthesis
- 12 Iron overload
- 13 Megaloblastic anaemia
- 14 Haemoglobin and the inherited disorders of globin synthesis
- 15 Sickle cell disease
- 16 Hereditary disorders of the red cell membrane and disorders of red cell metabolism
- 17 Acquired haemolytic anaemias
- 18 Red cell immunohaematology
- 19 Clinical blood transfusion

Part III Lymphoid disorders

- 20 The classification of lymphomas
- 21 Adult acute lymphoblastic leukaemia
- 22 Childhood acute lymphoblastic leukaemia
- 23 Chronic lymphocytic leukaemia and other chronic B-cell lymphoproliferative disorders
- 24 T-cell lymphoma and lymphoproliferative disorders
- 25 Hodgkin lymphoma

- 26 Indolent non-Hodgkin lymphomas
- 27 Aggressive B-cell non-Hodgkin lymphoma
- 28 Multiple myeloma
- 29 Amyloidosis

Part IV Stem cell and myeloid disorders

- 30 Inherited aplastic anaemia/bone marrow failure syndromes
- 31 Acquired aplastic anaemia and paroxysmal nocturnal haemoglobinuria
- 32 Acute myeloid leukaemia
- 33 Chronic myeloid leukaemia
- 34 The myelodysplastic syndromes
- 35 Myeloproliferative neoplasms
- 36 Macrophages dendritic cells and histiocytic disorders
- 37 Stem cell transplantation
- 38 Clonal haematopoiesis

Part V Haemostasis and thrombosis

- 39 Normal haemostasis
- 40 The vascular function of platelets
- 41 Haemophilia and von Willebrand disease
- 42 Rare inherited coagulation disorders
- 43 Acquired coagulation disorders
- 44 Congenital platelet disorders
- 45 Primary immune thrombocytopenia
- 46 Thrombotic thrombocytopenic purpura (congenital and acquired) and haemolytic-uraemic syndrome
- 47 Antithrombotic agents
- 48 Pathogenesis of venous thromboembolism
- 49 Prevention and management of venous thromboembolism
- 50 Pathogenesis and management of arterial thrombosis

Part VI Consultative haematology supportive care and miscellaneous disorders

- 51 Haematological aspects of conditions that occur primarily in tropical countries
- 52 Lysosomal storage disorders
- 53 Obstetric haematology
- 54 Neonatal haematology
- 55 Supportive care in the management of leukaemia
- 56 General consultative haematology
- 57 Consultative haemostasis and thrombosis
